Welcome to the **WIRe** – the **W**erth **I**nformation **Re**source

Using the WIRE

The **WIRe** is a reference and sales support document, individual pages of which can be copied or downloaded to assist PC Werth customers.

Purchasing and product information

The WIRe is split into sections according to product type. Many of these sections are priced for your convenience however some products, such as technical instrumentation and equipment require a quotation request form to be sent to us. These can be found online on our webstore or via email at **sales@pcwerth.co.uk**. If you require more information, the website also hosts detailed spec sheets for most of our products. Alternatively, just call the sales team at PC Werth for more information, product specifications or ordering.

Product information and marketing

The WIRe has been designed to support your local marketing or customer information. Any individual page can be copied and high resolution pages for printing can be downloaded at **www.pcwerth.co.uk/professional**.

*You will need to register a professional account with us at **www.pcwerthstore.co.uk***

Prices

PC Werth is committed to providing excellent products, services and value. Product and service updates will be posted on our website and sent by email.

By registering at **www.pcwerth.co.uk/professional** we will update you of any new products or prices by email.

Where to find the WIRe

Viewing and Download: Sections of The WIRe can be viewed and downloaded in low resolution at the PC Werth homepage - **www.pcwerth.co.uk**

Printing: The WIRe can be downloaded in high/print quality format at **www.pcwerth.co.uk/professional**

Printing sections and pages

The **WIRe** is an integrated framework to bring all PC Werth products and services together online and on paper. Professionals may find that they use some elements of the **WIRe** frequently, and others that they prefer to ignore. Pages can be **copied**, **downloaded** and **printed** or even printed oversize as **mini posters**, quickly and **easily at www.pcwerth.co.uk/professional.**

The WIRe includes **overviews** of instruments, **relevant technologies** and product ranges to support sales and marketing at a glance or support users during the product proposal stage or in-use.

Updates

Updating the **WIRe** could not be easier. Information and updates can be added or removed to maintain its integrity as an accurate guide and reference resource to PC Werth. New content will be posted online for download in a manageable format.

New material will be posted at **www.pcwerth.co.uk/professional** and we will also send you email notifications regarding any changes or updates available.

Please register for access and updates.

Bringing you the world's leading suppliers:

Fitting and Modifications

Cement
For cementing tubing into earmould or for joining tubing. Includes application brush

Code: **119**

Tubing Reamer
Tool for removing old tubing and for earmould cleaning

Code: **120**

Tubing Threader
Tool for easy threading of new tubing into any post-aural earmould

Code: **132/T**

Desol Thinners
For thinning Silisol lacquer and brush-cleaning. 250ml

Code: **098L**

Core Drill
Stainless steel cutter

Code: **Wide Bore – 103 WB**

Core Drill + Threader
Stainless steel cutter with built-in tubing threader/cleaner. Suitable for medium or wide bore tubing.

Code: **104**

Tubing
High quality kink-free tubing with high wall strength and long softness retention.
Wide: 2.16x3.2mm.
Medium: 1.93x3.1mm.
Medium+Thick Wall: 1.93x3.3mm.
(Inside x outside diameter)

Code:
Wide – 114/TW A
Medium – 114/TM A
Medium+Thick Wall – 114/TT A

Pre-Bent Tubing
Single bend Tygon tubes in convenient lengths to save time and effort.
Pack of 25 tubes.
Dimensions: Wide - 2.16 x 3.2mm.
Medium - 1.93 x 3.1mm.
Medium + Thick Wall - 1.93 x 3.3mm.
(Inside x outside diameter)

Code:
Wide – 372SBW
Medium – 372SBM
Medium + Thick Wall – 372SBT

Libby Horn
Enhances and extends high frequency response when fitting high-tone losses, especially open-ear fittings

Code:
3mm – 330 3 A
4mm – 330 4 A

Workroom Equipment

Drills & Bits
Great value kit full of replacement and extra tools for the Small Rechargeable Drill Kit above. Contains: steel and Nylon brushes, cutting disc & felt wheel & sanding drum holders, milling points, HSS drill bits, grinding points, sanding drums, sanding discs, cutting discs, felt polishing wheels, cotton polishing wheel, grinding wheels, brass wheel, Nylon wheel, sharpening stone, collet spanner, LED illuminator.

Code: **170AK**

Turning Motor
Small battery-powered motor for gripping a freshly lacquered earmould or shell and rotating it under a light gun or within a light-box for even curing.
Dimensions: 73 x 33 x 50 mm (W x D x H)

Code: **398/TM**

Lacquer & Thinners
For coating hard Fotoplast earmoulds to provide a hypoallergenic surface. 60 second curing time using UVA light.

Code: **50ml - 410L3**

Earmould Lab Equipment

	Code
Bench Top Polishing Unit with extractor A quiet and efficient bench-top polisher with integral suction and dust extraction system. Built in work light and two polishing spindles for mops. This unit can also be used for grinding silicone and acrylic items with the optional Grinding Set attachment (see below)	**440B**

High-Speed Micrometer with Brushless Handpiece PC Werth's laboratory micromotor has many outstanding features that deliver ease of use, quiet operation and plenty of power to carry out tasks efficiently. The brushless, ergonomically designed handpiece operates quietly with low vibration for a comfortable work environment and less operator fatigue. The multi-switching function allows easy changing between bench-top and foot control (the Universal model 257MK also has knee control). Auto Cruise lets the operator fix the rotation speed during work with the foot pedal to reduce fatigue. The unit also has self-diagnostics and an error-code display for quickly dealing with operating problems. Rotation speed – 1,000-50,000 rpm. Maximum power – 230W. Maximum torque – 7.8Ncm. Weight 235g.	**257M**	**Tabletop + foot control**
	257MK	**Tabletop + knee + foot control**

Burrs, Drills Mops & Cutters

For complete range see accessories section

BIOPOR Earmould System

Biopor BTE earmould material is perfect for manufacturing tear-resistant soft and flexible BTE earmoulds, noise plugs and swim plugs. Processing is done at room temperature using Dreve's unique 2-part addition-vulcanising material. Available in many colours and hardnesses, which can be combined for personally customised results, even multi-colour earmoulds are easily made! Fully tested biocompatibility makes the final result physiologically safe and emission-free.

Stocked colours and hardnesses – other varieties to special order, please see below and call for details of pricing and minimum quantities

PERFECTfit by PC Werth

Your ears are as individual as your needs. Get more out of life with our range of custom made solutions, tailored for the ultimate in comfort and protection.

Using the latest production technologies and materials, **PERFECTfit** solutions from PC Werth combine the highest levels of attention to detail and craftsmanship with ground-breaking innovation.

By entrusting your custom moulds to our London Laboratories, users benefit from a unique investment in expertise. PC Werth has been manufacturing and supplying professional ear care products for over 60 years.

PERFECTfit custom products are manufactured in our ISO accredited facility. We partner the world's leading companies to ensure a durable, premium quality product that performs brilliantly and gives exceptional value.

About PERFECTfit

PERFECTfit is the PC Werth range of custom made in ear products for noise protection and leisure. Crafted in our London Laboratories to German standards of excellence, our moulds are some of the finest in the world and offer the highest levels of comfort, fit and protection.

Why PC Werth?

Expertise: we have the highest level of expertise available in the market. In addition to over 60 years of experience supplying hearing healthcare professionals, our laboratories pioneered laser earmould manufacture in the UK.

Turnaround: our fully equipped laboratory is designed to be responsive to every customer's needs, from important individual orders to consistently high quality bulk jobs. Our standard turnaround time for individual moulds is just 4 days, guaranteed. We can also offer a 24 hour turn around time for urgent jobs.

Quality: our production processes are fully ISO certified.

Partners: with over 30 years as supply partner to Dreve Otoplastic of Germany, Etymotic Research and ACS, **PERFECTfit** products comprise only the finest materials and components.

Noise Protection: Instant Fit

NOISE PRO
PROTECTION FROM LOUD AND DAMAGING NOISE

PERFECTfit
FROM PC WERTH

PC Werth
Advanced Sound Technologies

Instant Fit solutions from PC Werth provide effective, universal noise protection.
Our range of instant fit solutions - including kids hearing protection - is always growing.
If you cannot see the product that you are looking for, please get in touch with us.

IN EAR

Foam Plugs

Instant, disposable plugs

Noise plugs in soft energy-absorbing slow recovery polymer foam. Provide up to 28dB SNR and all day comfort.

IF YOU CANNOT SEE WHAT YOU REQUIRE ON THIS SHEET PLEASE CALL US ON 020 8772 2700

HD20

ETYMOTIC RESEARCH INC.

Instant industry standard hearing protection that enables clear and precise communication

High-definition ear plugs from Etymotic Research. Protects hearing and allows the user to hear clearly and stay aware of their surroundings.

ER20

ETYMOTIC RESEARCH INC.

Instant all-round protection for music lovers and professionals

Unique construction uses an ACCU-Tuned resonator and acoustic resistor to reduce sound levels evenly across the frequency range, without changing the clarity of speech or the richness of music.

OVER EAR

Ear defenders

Great quality classic protection muffs for adults

They come complete with a comfortable padded head band. weighing from just 190 grams, these earmuffs are light but sturdy. They can be folded up to fit in the palm of your hand, making them easy to carry with you, or store away. Use them to protect your hearing in a wide variety of settings - from concerts and car races to sporting events and shopping centres.

Kids defenders

Great quality classic protection muffs for kids

Great for concerts and other noisy environments! They come complete with a comfortable padded head band. Weighing only 190 grams, these earmuffs are light but sturdy. They can be folded up to fit in the palm of your hand, making them easy to carry with you, or store away. Use them to protect your child's hearing or to help settle them when disturbed by a noisy environment.

FOR MUSICIANS
ER series

All filters PPE certified

ETYMOTIC RESEARCH INC.

The musicians choice: designed by musicians for musicians

Made to perfection using techniques which allow clarity of sound to pass through the filter, while still blocking out damaging noise levels. Our ER filters have been independently tested by BSI (British Standards Institute) for accuracy and to conform to EN352-2 (ER15 and ER25), the European standard applicable to hearing protection products supplied within Europe.

FOR LEISURE / MOTORSPORT
PRO series

All filters PPE certified

acs

Smaller filters and moisture resistant for motorsport and industry

The PRO series launched in 2011, and created a new era in level attenuating hearing protection. The filters are vented to allow sound to pass both ways which means that remaining sound can escape directly through the filter providing one of the most natural sounding earplugs available.

FOR INDUSTRY
DLO series

All filters PPE certified

Dreve

Cost effective PPE protection for industrial use

DLO® Acrylic and DLO® Silicone are certified and authorised personal protective equipment according to the directive 89/686/EEC.

FOR GENERAL USE
SOLID series

PC Werth
Advanced Sound Technologies

Simple and cost effective protection

Solid moulds do not have a filter. They are comfortable to wear, and offer a great source of protection against high frequency noise.

Noise Protection: Electronic

NOISE PRO
PROTECTION FROM LOUD AND DAMAGING NOISE

PERFECTfit
FROM PC WERTH

PC Werth
Advanced Sound Technologies

Our high definintion earplugs are designed to give wearers the best of both worlds: effective protection from noise and clear communication. These electronic solutions are safer than traditional earplugs because they can be worn at all times, allowing you to hear naturally, yet will provide instantaneous and automatic protection against noise.

FOR MUSICIANS
MP15 series

ETYMŌTIC RESEARCH INC.

MP15 Electronic Earplugs

Ideal for anyone who works or plays in and around music such as directors, performers, front-of-house, entertainment industry security and staff, concert and club goers. MusicPro earplugs are active noise-reduction earplugs that allow natural hearing when levels are safe and automatically adapt to changing sound levels. They offer automatic protection from loud sustained music as well as sudden, loud percussive sounds.

FOR INDUSTRY
HD15 series

ETYMŌTIC RESEARCH INC.

HD15 Electronic Earplugs

Ideal for persons who operate some or most of the time around continuous loud noise such as power tools, machinery, trucks or construction equipment, and want both maximum protection from loud impact noise and natural hearing when no background noise is present.

HD•15 earplugs allow natural hearing until noise exceeds safe-exposure limits. There is automatic activation of 15-dB hearing protection plus maximum protection from sudden, loud impact noise.

At the flip of a switch sound is amplified, improving distance detection by up to five times for enhanced awareness of your surroundings.

OPTIONAL
Custom•Fit Ear Tips

Optional Custom•Fit Ear Tips

Custom Fit Ear Tips will dramatically improve the listening experience. Exact moulds of your ears will produce an unrivalled quality of sound, as preferred by many musicians and sound professionals

Safeshoot
IMPULSE PROTECTION

As used by Steve Scott UK Olympic and World Champion trap shooter.

The sound of gunfire can permanently damage your hearing in milliseconds. It is essential to use the correct high performance protection plugs in order to prevent irreversible damage.

4 DAY TURNAROUND GUARANTEED
24 HOUR TURNAROUND AVAILABLE ON REQUEST

SOLID

PC Werth Advanced Sound Technologies

Great for those who desire overall and indiscriminate noise reduction.

Solid ear plugs cut out about 30 decibels of noise. This greatly reduces the impact a gunshot can have on your hearing. This is a cost effective way of protecting your hearing.

SONIC VALVE

acs

Cut out loud impulse and gunshot sounds while allowing for normal conversation to be heard.

Sonic Valves provide an intelligent solution to protecting your hearing whilst shooting. Passive valves react upon impulse from sound waves and shutdown momentarily when the gun fires. They are not electronic and the valve barrels can be removed for easy cleaning of the moulds. They are ideal for anyone that comes in connection with gunfire, such as sportsmen, police firearms officers and army personnel.

HOCKS FILTERS

PC Werth Advanced Sound Technologies

Minute thermal technology blocks out high frequencies only, allowing normal conversation to be heard.

Hocks Filters convert sonic energy into thermal energy by means of compression acceleration. The rise in temperature is so minute you will never notice it. You can still hear, but a dangerous level of sound cannot possibly get through the filter.

GUNSPORT•PRO

GSP1

GSP15

enhance with CUSTOM•FIT by PERFECTfit FROM PC WERTH

ETYMŌTIC RESEARCH INC.

The ultimate in natural hearing and total protection.

GunSport PRO GSP•1 and GSP•15 Electronic Earplugs are for those who want to hear naturally and be protected from sudden firearm blasts when there isn't time to insert earplugs. Enhanced hearing circuits Improve distance detection up to 5X.

GunSport•PRO electronic earplugs are designed for gun sport enthusiasts in the field or at the range where enhanced awareness, clear communication and blast protection are desired.

	SOLID	SONIC VALVE	HOCKS FILTERS	GSP•1 / GSP•15 ELECTRONIC EARPLUGS
	Solid plugs can be used in any environment where it is necessary to cut out high frequency noise.	Sonic valves are favoured by clay pigeon shooters who require protection from loud bangs when out shooting.	Also great for those who are exposed to gun fire – thermal energy created by sound waves will cause the filter to close and stop damaging noise from hitting the ear drum. 	For those who want to hear naturally and be protected from sudden firearm blasts without having to repeatedly insert and remove plugs for ambient hearing.
Attenuation	Up to 30db	Up to 60db	Up to 35db	25db
Applications	Any industry with loud frequency noise, as well as sportsmen, police firearms officers and army personnel. This option is not recommended if the wearer needs to hear conversations or speak within the noisy environment.	Sportsmen, police firearms officers and army personnel	Sportsmen, police firearms officers and army personnel	GunSport•PRO electronic earplugs are designed for gun sport enthusiasts in the field or at the range where enhanced awareness, clear communication and blast protection are desired. GunSport electronic earplugs allow you to hear naturally as though nothing is in the ears, but protects from blasts.

MusicClear

MONITORS AND EARBUD SLEEVES

Standard earbuds leak sound. Because external noise can enter the ear it disrupts music, resulting in less listening pleasure and higher volumes to compensate. These louder volumes can severely damage your hearing.

MusicClear buds create a perfect seal to block unwanted external noise, resulting in better music at lower, safer volumes. And because they are tailored to your ears, **MusicClear** buds are super-comfortable.

Super-comfortable ear-bud adaptors and earphone sleeves for gamers, music lovers and professionals.

EARPHONE SLEEVES

PC Werth Advanced Sound Technologies

The best way to transform the sound quality of any earbud

Cut out background noise with custom moulded earphone sleeves made to fit your current set of earphones. This allows a greater clarity of sound to reach your ear drum, and can protect your hearing as you do not to turn the volume up so much in order to hear!

HYBRID MONITORS

acs

If you order a set of ER or PRO hearing protection moulds, we have specially designed earphones that plug in to exactly the same mould! They are extremely high quality monitors, and have a variety of features and functions.

Softnight

SLEEP PLUGS

Ultra-soft plugs comfortably block out noise for a better sleep at home or when travelling.

Sleep plugs

Softnight sleep plugs are crafted to reduce noises that may prevent sleep, such as snoring or travel noise.

For additional comfort, **Softnight** plugs are made from extra-soft "Powersil" silicone that flexes to accommodate any movement of the ear on the pillow during sleep.

HEARING AID MAINTENANCE TOOLKIT - WITH BATTERY TESTER

Code: 013KIT

Ingenious pocket multi-tool for complete maintenance of all types of hearing aid. The fold-out case contains a selection of miniature tools: brush, wax loop, tube/vent cleaner, battery drawer opener, battery extraction magnet. There's storage for two spare batteries and even an LCD digital tester for checking battery condition. The Toolkit is pocket-sized and made of robust lightweight plastic.

WONDER TOOL - ITE BATTERY EXTRACTOR

Code: 235WT

Battery extractor tool in tough steel - gets batteries out guaranteed!

RAY-O-VAC MAGNET PEN

Code: 235 RMP

Rayovac battery extractor pen. Pen-shaped battery extractor/insertion magnet for handling fiddly small hearing aid batteries.

HEARING AID BATTERY TESTER - DIGITAL LCD READOUT

Code: 011 A

Useful hearing aid battery tester for all sizes, on keychain. Digital LCD display of battery condition. Storage compartment for two spare batteries.

AIR BLOWER OR PUFFER FOR HEARING AIDS

Code: 008 A

Essential rubber air puffer for removing particles and moisture from hearing aids and tubing after cleaning.

SUPER DRI-AID HEARING AID DRYING KIT

Code: 040 A

Hal-Hen's Super Dri-Aid takes drying of hearing aids to a new level. Using 'Molecular-Sieve' technology, Super Dri-Aid acts faster and more thoroughly than other types of drying agent. Even better - the drying elements can be re-activated many times over - saving time and money for the hearing aid wearer. Supplied in an airtight glass container that will take any size of hearing aid.

MINI SUPER DRI-AID HEARING AID DRYING KIT

Code: 039 A

Hal-Hen's Mini Super Dri-Aid takes drying of hearing aids to a new level, but in a smaller size for wearers of ITE and CIC aids.

Using 'Molecular-Sieve' technology, Super Dri-Aid acts faster and more thoroughly than other types of drying agent. Even better - the drying elements can be re-activated many times over - saving time and money for the hearing aid wearer. Supplied in an airtight glass container.

MINI DRI-AID HEARING AID DRYING KIT

Code: 024 A

Hal-Hen's Mini Dri-Aid comprises of a small airtight plastic tub into which a mini-BTE, ITE or CIC aid is placed overnight. Compact and discreet - ideal for travelling. Uses re-chargeable silica gel capsule. Full instructions supplied.

HEARING AID BATTERY TESTER - LED INDICATOR

Code: 012 A

Useful hearing aid battery tester for all sizes, on keychain. LED indicates battery condition. Storage compartment for two spare batteries.

Weight: 650g

ETYMOTIC ETY BLU2 - BLUETOOTH HEADSET

Code: ER/BLU2

Best-in-Class Bluetooth Headset

The etyBLU2 headset delivers the clearest conversations on the market due to its ACCU•Noise Reduction™ Technology.

This patented technology reduces noise by at least 30 dB at the the microphone and earpiece providing “Best-in-Class” speech intelligibility and conversational clarity.
Best speech clarity: High definition microphone with a boom ensures the optimal speech clarity in all environments
Best sound quality: High-output amplifier and a 8-mm neodymium driver for the clearest, most accurate sound and speech
Best noise isolation: Noise is eliminated at the ear up to 98% ensuring the clearest listening experience for any Bluetooth headset on the market. An assortment of noise-isolating ACCU•Fit™ eartip options provide proper sealing of the ear canal

AMPLICOMMS TV150 TV LISTENER SYSTEM

Code: AM/TV150

The Amplicomms TV 150 is ideal for the hearing impaired user to listen to many sound and music sources, such as TV, radio, PC, MP3 player and HiFi. Using Infrared wireless technology the TV 150 transmits high quality sound from the source to a lightweight headset. Family and friends of the user no longer have to endure high sound levels, whilst the hearing impaired user experiences good quality sound at the level they want.

EXTRA AMPLICOMMS TV150 TV LISTENER HEADSET

Code: AM/TV150-1

Additional headset for the Amplicomms TV 150 TV listener. The TV 150 base station accepts up to two headsets (the one supplied with the original plus one other)

ETYMOTIC ER4P EARPHONES - FOR PORTABLE PLAYERS AND COMPUTERS

Code: ER/4P

ETYMOTIC ER4S EARPHONES - FOR PROFESSIONAL STUDIO USERS

Code: ER/4S

ETYMOTIC ER4PT EARPHONES - WITH AIR TRAVEL ACCESSORIES

Code: ER/4PT

The ER•4 MicroPro series earphones were the first insert phones using moving armature technology and are recognised as the world leader in response accuracy, to which all other earphones are compared. These reference-quality earphones are still the choice of serious sound engineers, audiophiles and musicians.

ER•4P earphones can be used with portable devices without an additional amplifier. Compared to the ER•4S, the ER•4P has 10 dB greater output at high frequencies and 13 dB greater output at low frequencies. The higher sensitivity and enhanced bass of the ER•4P have made it the most popular earphone in the series. Frequency Response 20 Hz - 16 kHz Accuracy Score4B (92%) 4S (92%) 4P (86%) 4PT (86%). Each pair is hand matched in factory for frequency response and sound accuracy. Supplied in presentation box, complete with accessories. CUSTOM•FIT option available

ACS T15 MODULAR MONITOR (PAIR)

High quality drivers that adapt standard ER custom ear moulds into custom made earbuds.

Please note – custom moulds extra

Code: 360 T15

ETYMOTIC ETY-KIDS 3 EARPHONES + APPLE 3-BUTTON MIC - BLACK

Safe-listening earphones for children. With Apple 3-button controller with microphone for use with iPod, iPhone and iPad.

Code: ER/EK3

ETYMOTIC ETY-KIDS 5 EARPHONES – BLACK

Safe-listening earphones for children without microphone are for music players and DVD players etc. Use 3 model for Apple iPhone/iPod applications

Specially designed to protect children's developing hearing from damage caused by over-exposure to loud sounds from MP3 players and smart phones. Engineered for safe sound output while maintaining the famous Etymotic Research superior sound quality. Sound heard through ETY-Kids earphones will not exceed safe levels when used with today's popular portable players.

Etymotic Research invented earphones and high-fidelity hearing protection. Comes with medical-grade eartips in several sizes to fit even the smallest ears. Intended for ages 4 and older and anyone overly sensitive to loud sounds. Uses ACCU-Chamber technology to enhance response accuracy and smooth out harmful response peaks CUSTOM•FIT option available

Etymotic Research's HF Earphones are a no compromise, high-performance noise-isolating headset + earphones that delivers best-in-class benefits for the price. perfectly matched to the latest product innovations from most smartphones. Documented as highest performance noise isolating earphones available today. Supplied with assorted eartips or CUSTOM•FIT option available

85%+ response accuracy from 20 Hz – 15 kHz. Achieves highest output sensitivity in its class with 105 dB SPL sensitivity at 1 kHz at 0.1 mV. Accu•Driver™ high performance, precision matched, balanced armature drivers. 35 dB - 42 dB noise isolation

Code: ER/HF5

ETYMOTIC MC3 EARPHONES + APPLE 3-BUTTON CONTROLLER/MIC BLACK
Noise isolating, superior dynamic moving-coil earphones, with 3-button microphone/controller for use with Apple iPod, iPhone, iPad, for the best quality sound at a low price point.

Code: ER/MC3

ETYMOTIC MC2 EARPHONES + 1-BUTTON CONTROLLER/MIC - BLACK
Noise isolating, superior dynamic moving-coil earphones, with microphone/controller for use with Android, Windows and Blackberry devices, for best quality sound at a low low price point..

Code: ER/MC2

ETYMOTIC MC5 EARPHONES - BLACK
Noise isolating, superior dynamic moving-coil earphones for the best quality sound at a low low price point..

Etymotic makes the world's most accurate noise-isolating headsets and earphones in all price categories. Other earphones use moving coil drivers that have undesirable frequency response peaks and weak highs. Etymotic created a design that makes dynamic drivers sound like high-end drivers by inserting a proprietary acoustic side-branch to redistribute energy, smooth the peaks and compensate for weak highs. The result is the MC-series with best-in-class performance for the price. CUSTOM•FIT option available

85%+ response accuracy, Tight, accurate bass with crystal clear high frequency detail at all listening levels. 35 dB - 42 dB of noise isolation. Polished aluminium finish. Supplied with pouch, tip assortment and wax filters. CUSTOM•FIT option available

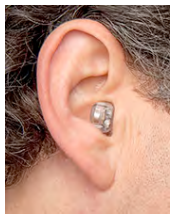
ER200D model adds data-logging functions and PC connectivity. (Compatible with Windows XP, SP2 or later. Not compatible to Windows Vista & Windows 7) Features: Color-coded LEDs indicate safe, borderline and high-risk exposures Data table and printable reports are automatically created in Excel Programmable dose Criteria: - NIOSH (85 dB criterion, 3 dB exchange rate, 75 dB threshold) - OSHA (90 dB criterion, 5 dB exchange rate, 80 dB threshold) - CUSTOM (User-defined criterion, exchange rate and threshold) Choice of run time: 16 hours, 3, 5 or 7 days,	**Code: ER/200D**



GSP1 – SHOOTERS EAR PROTECTION WITH ENHANCED HEARING MODE, INCLUDING PCWERTH CUSTOM FIT TIPS

Code: ER/GSP1

GSP15 – SHOOTERS HEARING PROTECTION PLUS NOISE ATTENUATION AND ENHANCED HEARING MODE, INCLUDING PC WERTH CUSTOM FIT TIPS

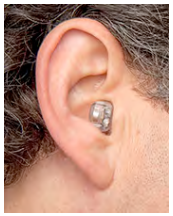
Code: ER/GSP15

Universal fit hearing protection that permits normal hearing and situational awareness with instantaneous protecting against extreme blasts. Also offers enhanced hearing for quiet sounds and noise attenuation (GSP15 only).

For Shooters, guides, hunters, instructors

Benefits/features:

- Instant fit for all ears off the shelf
- Custom fit option for extra comfort
- Up to 40dB blast protection from 120dB+ impulses
- 15dB attenuation in environments over 85dB (GSP15)
- Switchable option of 5dB gain for sounds under 60dB
- Safer than passive filters: users are fully protected at all times
- Maintains communication and awareness for safety
- Users are instantly protected
- Long battery life of up to 2 weeks
- Fail safe operation
- Enhanced hearing function improves awareness to compensate for problem hearing or better hunting outcomes



ETYMOTIC HD15 – ELECTRONIC NOISE PROTECTION WITH ENHANCED HEARING MODE FOR WORK AND LEISURE

Code: ER/HD15

Universal fit hearing protection that permits normal hearing and situational awareness with instantaneous protecting against extreme blasts. Also offers enhanced hearing for quiet sounds and 15dB noise attenuation.

For builders, workers, machinists and general DIY use

Benefits/features:

- Instant fit for all ears off the shelf
- Custom fit option for extra comfort
- Up to 40dB blast protection from 120dB impulses
- 15dB attenuation in environments over 85dB
- Switchable option of 5dB gain for sounds under 60dB
- Safer than passive filters: users are fully protected at all times
- Maintains communication and awareness for safety
- Users are instantly protected
- Long battery life of up to 2 weeks
- Fail safe operation
- Enhanced hearing function improves awareness to compensate for problem hearing or better hunting outcomes

ETY-PLUGS ER20 – PRO QUALITY, INSTANT-FIT NOISE PLUGS FOR MUSICIANS ER20 MUSICIANS PLUGS - STANDARD SIZE ER20 MUSICIANS PLUGS – LARGE, CLEAR ER20 MUSICIANS PLUGS – LARGE, PURPLE ER20 MUSICIANS PLUGS – LARGE, RED ER20 MUSICIANS PLUGS – LARGE, BLUE Low cost re-usable High Fidelity noise protection. Seal better than standard foam and last longer. Improves safety and protection by maintaining clarity of speech and music, so users are less tempted to remove their protection to maintain situational awareness. Specially designed for musicians musicians, clubbers and bar staff, where sound quality is highly important. 20dB SNR or 12dB NRR. Regular use will protect the user from the cumulative effects of overexposure to loud sound. Uses an ACCU-Tuned resonator and acoustic resistor to reduce sound levels evenly across the frequency range, without changing the clarity of speech or the richness of music. Music and speech remain clear, but quieter and safer.	**Code:ER/20S MB** **Code: ER/20CCC** **Code: ER/20PSC** **Code: ER/20RSC** **Code: ER/20BSC**

ETY-PLUGS ER20 – PRO QUALITY, INSTANT-FIT NOISE PLUGS FOR GENERAL USE ER20 HIGH-DEFINITION EARPLUGS – STANDARD SIZE, CLEAR ER20 HIGH-DEFINITION EARPLUGS – LARGE, CLEAR Low cost re-usable High Fidelity noise protection. Seal better than standard foam and last longer. Improves safety and protection by maintaining clarity of speech and music, so users are less tempted to partially extract their protection to maintain situational awareness. Created to protect the hearing of all users, including builders, manual workers & machinists, safety inspectors, motorsport/sport fans and DIY enthusiasts. 20dB SNR or 12dB NRR. Regular use of these earplugs will protect the user from the cumulative effects of overexposure to noise. Uses an ACCU-Tuned resonator and acoustic resistor to reduce sound levels evenly across the frequency range, without changing the clarity of speech or the richness of music. Music and speech remain clear, but quieter and safer.	**Code: ER/20SFTF** **Code: ER/20SFTW**

Consulting & Examination

As well as Audiometric equipment, P.C.Werth can provide you with all the tools you need for an accurate and safe consultation.

Our expanded range of Otoscopes from Heine will provide the best results, especially the fibre-optic models which give an unobstructed view of the ear canal.

Favourites like the heavy-duty stetoclip and Hal-Hen's beautifully made Earlite set work with you to get the best results for you and your patients.

If you don't see the item you need please call us – we keep stocks of many different types of audiological equipment and sundries. Volume prices make it easier for you to plan and control costs, whilst offering excellent value.

Impressioning Materials & Accessories

Only a precise impression provides the basis for a good hearing aid fit.

Our range of impressioning materials and tools, sourced exclusively from Dreve Otoplastik GmBH, offers world-leading technology and the assurance that you are giving your patients the very best care.

PC Werth
Advanced Sound Technologies

www.pcwerthstore.co.uk

DREVE OTOFORM AK IMPRESSION MATERIAL

Dreve's famous industry-leading 2-part impression material in a manual-mixing format. An addition-vulcanising silicone with bio-compatible platinum catalyst for excellent results with the majority of patients. Otoform Ak is non-sticky and has a slightly pressure-forming consistency for superior fitting and acoustic sealing. Final hardness: 35 Shore A. Final colour: green.

OTOFORM AK: 2x400g (2x272ml) TUBS

Pack of 2 x 400g tubs plus measuring spoons. Provides approximately 55-60 impressions.

Code: 076A

DREVE OTOFORM Kc

Dreve's classic condensation-vulcanising impression material. Designed for the most economical usage, it is kneadable, smooth and non-sticky. Processed by adding a small amount (2%) of hardener to the silicone putty and mixing by hand or palette knife. Expert users can alter the setting times by slightly varying the amount of hardener applied, to suit different patients or situations. Otoform Kc has a slightly pressure-forming consistency for superior fitting and acoustic sealing. Final hardness: 30 Shore A. final colour: pink.

OTOFORM Kc 170G + 5g HARDENER + DOSING SPOON

Provides approximately 13-15 impressions.

Code: 070A/BOM

OTOFORM AK: 2x800G (2x544ml) TUBS

Pack of 2 x 800g tubs plus measuring spoons. Provides approximately 110-120 impressions.

Code: 077A

OTOFORM KC IMPRESSIONING MATERIAL - 800g + 20g HARDENER

Provides approximately 60-65 impressions

Code: 071A

OTOFORM AK: 50ML CARTRIDGE - 8-PACK

Pack of 8 x 50ml double cartridge. Provides approximately 40 impressions.

Requires manual injector 085CD
Requires canula 086A

Code: 087A

OTOFORM Kc HARDENER 5g. TUBE

Hardener paste for Dreve Otoform Kc impression material 170g tub. 5g tube.

Code: 072A

DREVE OTOFORM AK SAMPLE PACK - 2 X 1 0ML

Dreve Otoform Ak sample pack - 2 X 10ML. Sufficient for two average impressions (10ml per ear)

Code: DR/AKSAMPLE

OTOFORM KC HARDENER - 20g TUBE

Hardener paste for Dreve Otoform Kc impression material 800g tub. 20g tube.

Code: 073A

DREVE OTOFORM AK X

Dreve Otoform Ak X 2-part silicone impression material offers the best solution for deep impressions, paediatric impressions or where the operator wants an easier material to dispense needing less effort. Otoform Ak X is smooth, free-moving and has a tack-free velvet consistency with very low oil content. Ak X also has excellent flow characteristics and shows no slumping whilst being applied.
Curing time is 3 minutes at room temperature, with a fast snap-effect.

Final hardness: 30 Shore A. Final colour: pink.

DREVE OTOFORM AK X - 2 X 500ML TUBS + SPOONS

Sufficient for 100-120 impressions

Code: DR/AKX1000

DREVE OTOFORM AK X - 2 X 250ML TUBS + SPOONS

Sufficient for 50-60 impressions.

Code: DR/AKX500

OTOFORM A FLEX IMPRESSION MATERIAL

Dreve's soft 2-part impression material in a cartridge dispenser format. An addition-vulcanising silicone with bio-compatible platinum catalyst for excellent results with the majority of patients. Otoform A Flex has a pasty consistency especially suitable for deeper impressions or for use with children. Final hardness: 25 Shore A. Final colour: Turquoise

OTOFORM A FLEX IMPRESSION MATERIAL 50ml 8-PACK

Provides approximately 45-55 impressions
This product requires an impression gun (code 085CD) and mixing canula (code 086X)

Code: 088A

OTOFORM A SOFTX IMPRESSION MATERIAL -50ml CARTRIDGE - 8-PACK

Dreve Otoform A softX 2-part silicone impression material offers the best solution for deep impressions, or where the operator wants an easier material to dispense with less effort. A softX is softer with excellent flow characteristics and shows no slumping whilst being applied. Final hardness: 25 Shore A. Final colour: pink.

Pack of 8 x 50ml (S50 type) double cartridges. Provides approximately 45-55 impressions (depending on patient's ear canal size and application technique).

Note - this product requires an impression gun (code 085CD) and mixing canulae (code 086S) to dispense correctly.

Code: 090S

DREVE OTOFORM AK X SAMPLE PACK - 2 X 10ML

Sufficient for two average impressions (10ml per ear).

Code: DR/AKXSAMPLE

DREVE OTOPREN INSTANT BTE MATERIAL 48ML CARTRIDGE - 8-PACK

Dreve Otopren instant BTE earmould material. Otopren is a high quality 2-part addition-vulcanising silicone with a smooth consistency. It produces a clean and precise earmould which can be processed right out of the ear. Supplied in packs of 8 x 48ml cartridges. Final hardness: 55 Shore A. Final colour: pink transparent.

This product requires an impression gun (code 082) and mixing canulae (code 083 L) to dispense correctly. Coat immediately, after curing and trimming, with Otopren Lacquer (code 452)

Code: 451A

Earmould Lab Equipment

P.C.Werth provides a very fast precision earmould production facility based on computerised photolithography. But for those customers making earmoulds in-house, we stock the necessary equipment and materials for a quick turn-round of orders.

We have a complete range of tools and equipment for Earmould Labs – too many items to list here – so if you can't see the item you need below please give our sales desk a call.

IF YOU CANNOT SEE WHAT YOU REQUIRE ON THIS SHEET PLEASE CALL US ON 020 8772 2700

Earmould Lab Equipment

MICROMOTOR & HANDPIECE

Code: 257M

Brushless Micromotor with Handpiece. The perfect bench tool for finishing earmoulds and hearing aids shells.

Steplessly variable between 1,000 and 50,000 rpm with a smooth and powerful torque. The brushless motor is hermetically sealed for quieter operation and low maintenance. The handpiece is ergonomically designed to reduce operator fatigue. Auto-Cruise function fixes the rotation speed when working with the foot pedal and has a self-diagnosing function for fault-finding.

Speed: 1,000~50,000 rpm
Maximum power: 230W
Maximum torque: 7.8Ncm
Handpiece dimensions: 158 x 27 mm
Handpiece weight: 235g

LANGS AQUAPRES PRESSURE VESSEL FOR EARMOULD PROCESSING

Code: AQUAPRES

Hydraulic non-pneumatic pressure pot for processing silicone and acylic earmoulds to prevent bubbles forming and reduce porosity of the mould. Requires no power supply to operate.

AWAITING IMAGE

DUST ARM

Code: 257DA

Adjustable dust arm for use with the Airbox. Highly flexible cantilevered design which can be adjusted to suit the individual operator's preferences. Attaches to the bench surface and connects to a 32mm vacuum hose. Includes filter and transparent hood to direct irritant dust away from the operator to the vacuum hose.

GOLD FILTER

Code: 257GF

Replacement gold filter for Bench Peg (code 257BP) or Dust Arm (code 257DA)

DREVE POLYLUX 100 LIGHT CURING UNIT

Code: DR/POLYLUX100

BASIC LIGHT POLYMERISATION UNIT FOR REPAIR AND LAQUERING.

FEATURES: LIGHT SOURCE (2 X 9 WATT UVA TUBES, 315~400 nm) WITH MIRRORED INTERNAL SURFACES. ROBUST POWDER-

AIRBOX DUST EXTRACTOR (TISSI AIRBOX WITH AUTO-SUCTION

Code: 257E

Airbox dust extractor. Professional and compact extraction unit with variable suction and quiet operation. The supplied 32mm hose fits most bench peg systems. Triple layer replaceable filter bags capture all dust and irritants. Operation can be automatically controlled by the handpiece motor keeping operating noise to a minimum.

BENCH PEG

Code: 257BP

Bench Peg and filter for use with Airbox (code 257E in this section of the PC Werth Webstore). Clips to the front of almost any bench and connects to 32mm vacuum hose. Complete with a transparent hood to direct irritant dust away from the operator to the vacuum hose.

AWAITING IMAGE

FILTER BAGS FOR AIRBOX

Code: 257FB

Replacement filter bags for Airbox vacuum extractor (code 257E). Pack of 4 filters.

DUBLIMAT PRO - GEL MELTING UNIT FOR EARMOULD PRODUCTION

Code: 402

WEIGHT 21KG. DIMENSIONS: H 430 x W 370 x D 350 mm. CAPACITY: 6 KG MELTED HYDROCOLLOIDE GEL.

ORDERS MAY REQUIRE DIFFERENT VOLTAGE.

COATED FINISH AND COMPACT DIMENSIONS OF: 100 H x 95 W x 240 D (mm). POWER CONSUMPTION 30W. WEIGHT 1.7KG.

USE WITH TURNING MOTOR (398/TM) FOR BEST RESULTS

DREVE POLYLUX 500 - LIGHT-CURING UNIT

Dreve Polylux 500 Light Curing Unit. Compact and robust unit with mirrored polymerisation chamber for UV light-curing of Dreve Fotoplast resins and lacquers. Space for four negative earmould forms. Built-in timer.

Dimensions: External - W215 x D190 x H50 mm. Internal - W150 x D95 x H50 mm

Code: 398 PLX500

DREVE CROMALUX 75 HANDHELD LIGHT CURING UNIT

DREVE CROMALUX 75 HANDHELD LIGHT CURING UNIT

Code: DR/CROMALUX75

TURNING MOTOR

Battery powered turning motor with crocodile grip. Used for even coating and processing of earmoulds under UV light guns or enclosures. Dimensions: 73W x 33D x 50D in mm.

Code: 398/TM

DREVE ELECTRONIC IMPRESSIONING GUN WITH UK MAINS ADAPTOR

Dreve's unique cordless electronic impressioning gun for all cartridge-based silicone materials. Fits 48ml and 50ml (S50) cartridge types.

This rechargeable gun makes it easy to inject impressioning material in busy audiology departments. Changing

Code: 084/BOM

WAX DIPPING POT

Wax dipping pot for melting and warming of paraffin wax for adjustment of impressions prior to processing. With thermostatic control of temperature between approx. 10deg and 100deg C.

Power consumption - 100 Watt.
Voltage - 220-230V/50Hz
Dimensions - W 176 x D 176 x H 200 mm
Weight - 800g
Minimum capacity - 300ml
Maximum capacity - 500ml

Code: 142A

IMPRESSION WAX - 466 GM

Impression wax in convenient sheets. 2.5Kg box.

Code: 146

IMPRESSIONING GUN - MANUAL - FOR 48ML CARTRIDGES

Impressioning gun for use with all 48ml silicone material cartridges. Easy loading and dispensing with pistol grip action.

Code: 082A

EARMOULD TUBING REAMER TOOL **Code: 120**

Reamer tool for removing old tubing from earmoulds.

SELF GRIP TWEEZERS **Code: 134**

WIRE CUTTING/STRIPPING PLIERS **Code: 137**

Wire cutter. Steel side-cutting tool for wire, tubing, etc. Sprung with soft grips.

PENCIL FOR MARKING IMPRESSIONS **Code: 196 A**

Indelible Chinagraph pencil for marking silicone ear impressions with patient name, etc, prior to posting for earmould production.

DREVE CONICAL BRASS HOLDER **Code: 450 4273**

Conical solid brass holder with spring crocodile clip for holding earmoulds whilst appying lacquer or carrying out light-curing.

DREVE SINGLE CLAMPS (PACK 10) **Code: 450 4274**

BIOPOR CLAMP TWEEZERS **Code: 450 662**

Self-closing sprung clamp tweezers for holding Biopor and other soft silicone earmoulds whilst processing.

TUBING CEMENT - 50ml BOTTLE **Code: 119**

Cement for fixing earmould tubing. 50ml bottle with application brush.

Contents: 25631-327 dichloromethane GPR RECTAPUR UN 1593

SET OF 6 NEEDLE FILES NO.2 CUT **Code: 377**

Set of 6 different miniature needle files in a wallet.

SANDPAPER ROLL - 50M. **Code: 189 S**

SANDPAPER ROLL - 50M.

BIOPOR SANDPAPER - 120 GRAIN **Code: 450 3441**

Sandpaper Strip for general silicone and Biopor smoothing and finishing. 120-grit. 50-metre roll. (Use with Sandpaper Holder, code 189)

BIOPOR SANDPAPER - 220 GRAIN **Code: 450 3442**

Sandpaper Strip for general silicone and Biopor smoothing and finishing. 220-grit. 50-metre roll. (Use with Sandpaper Holder, code 189)

EARMOULD TUBING THREADER **Code: 132T**

Simple tool for easy threading of new tubing into any post-aural earmould. Plastic body with nylon thread. Each.

HSS TWIST DRILLS - SET OF 13 **Code: 306**

HSS Twist Drills - boxed set of 13 in the following sizes: 1.5, 2.0, 2.5, 3.0, 3.2, 3.5, 4.0, 4.2, 4.5, 5.0, 5.5, 6.0, 6.5 mm

STORAGE BOX FOR DRILLS & BURRS **Code: 450 730**

Storage box for drill bits, burrs, polishers, etc. Transparent lid.

BIONIX LIGHTED EAR CURETTE - COMPLETE KIT/MIXED PACK OF 50 CURETTES Bionix lighted ear curette - mixed pack of 50 curettes - includes light source and magnifier; plus 7 of each of: angleloop, microloop, wavecurette, ceraspoon, infantscoop, versaloop, plus 8 of flexloop. Bionix Lighted Curette - plastic, single-use, disposable. For use with Bionix light source and magnifier. 5-PACK BIONIX LIGHTED CURETTE - ANGLE LOOP BIONIX LIGHTED CURETTE - CERA SPOON BIONIX LIGHTED CURETTE - CERAPIK BIONIX LIGHTED CURETTE - FLEX LOOP BIONIX LIGHTED CURETTE - INFANT SCOOP BIONIX LIGHTED CURETTE - MICRO LOOP BIONIX LIGHTED CURETTE - VERSA LOOP BIONIX LIGHTED CURETTE - WAVE CURETTE BIONIX LIGHTED ARTICULATING CURETTE	**Code: BIO/LIGHTCURETTE/MIX PACK** **Code: BIO/ANGLE/L** **Code: BIO/CERA/L** **Code: BIO/CERAPIK/L** **Code: BIO/FLEX/L** **Code: BIO/INFANT/L** **Code: BIO/MICRO/L** **Code: BIO/VERSA/L** **Code: BIO/WAVE/L** **Code: BIO/ARTIC/L**		BIONIX SAFE EAR CURETTES - MIXED PACK OF 75 CURETTES Bionix safe ear curettes - mixed pack of 75 - includes 10 of each of green microloop, orange controloop, red angleloop, purple versaloop, blue infantscoop, yellow ceraspoon; plus 15 of white flexloop. Bionix Safe Curette - plastic, single-use, disposable. Removes wax effectively, more flexible and safer than metal curettes 5-PACK BIONIX SAFE CURETTE - ANGLE LOOP BIONIX SAFE CURETTE - CERASPOON BIONIX SAFE CURETTE - CONTROL LOOP BIONIX SAFE CURETTE - FLEX LOOP BIONIX SAFE CURETTE - INFANT SCOOP BIONIX SAFE CURETTE - MICROLOOP BIONIX SAFE CURETTE - VERSA LOOP	**Code: BIO/CURETTE/MIXPACK** **Code: BIO/ANGLE** **Code: BIO/CERA** **Code: BIO/CONTROL** **Code: BIO/FLEX** **Code: BIO/INFANT** **Code: BIO/MICRO** **Code: BIO/VERSA**
BIONIX LIGHTED FORCEPS - STARTER SET Bionix Lighted Forceps. Starter set of 1 x light source, 1 x magnifying lens, 10 disposable forceps. Provides light and magnification at the point of operation, for the ear and nose. This eliminates the need for separate lights and magnifying devices. The forceps open to accommodate objects as large as 5mm, with gripper teeth for a secure hold. BIONIX LIGHTED FORCEPS - REFILL 10-PACK	**Code: BIO/FORCEPS/L** **Code: BIO/FORCEPS/LR**		BIONIX ARTICULATED CURETTE - VERSA SCOOP - 5-PACK The only curette that articulates to assist in the removal of cerumen from the ear canal. The Articulating Safe Ear Curette™ works because of the unique living hinge at the tip and the split handle design. Once positioned beyond a cerumen plug, usually through a space between the ear canal wall and the plug, the tip can be articulated. The cerumen can then be pulled from the ear canal without using a blind sweeping motion.	**Code: BIO/ARTIC**

PC Werth
SOFTWARE
solutions

Software

PC Werth has always understood that the Audiometry sector is a dynamic and progressive place. Therefore providing the latest software to complement our audiologists' equipment and expertise is a top priority. PC Werth is now the leading supplier of diagnostic and rehabilitative and patient management software-based solutions.

LACE	The world's leading virtual audiological rehabilitation solution
ANL created by FRYE	The Acceptable Noise Level test (ANL)
QuickSIN™ Speech-in-Noise Test	The most widely used Speech-in-Noise test
BKB-SIN™ Speech-in-Noise Test	Speech-in-Noise test for children, cochlear implant users and adults
HS IPRO INTERNATIONAL	Tailor-made self hosted office management solution for hearing aid dispensers
Strato	Cloud-based office management solution for database storage from Auditdata
HNN	Customisable visual presentation of hearing-related health issues for waiting rooms and information services

IF YOU CANNOT SEE WHAT YOU REQUIRE IN THIS SECTION PLEASE CALL US ON 020 8772 2700

LACE UK Edition

HEARING IS ONE THING
You hear with your ears.
LISTENING IS ANOTHER
You listen with your brain.
LACE HELPS YOUR BRAIN GET THE MESSAGE
Improve your ability to hear speech in noisy settings by 40%.

The LACE Process

LACE is unique in the way it puts users in control of learning at their own pace, in their own home, with as much practice as they need

1: Discuss you needs with your Certified LACE Professional
2: Take a 12 minute introductory session with LACE
3: Complete the LACE course in short regular steps at your own home
4: Review your improvement with your LACE professional
5: Refresh your listening skills at home with LACE as required on DVD or on PC

ANL - Acceptable Noise Level

Determine the probability of hearing aid success in just 2-3 minutes!

The Acceptable Noise Level test from Frye Electronics Inc is possibly the most essential test available. The test gives an 85%* accurate prediction of hearing aid success. The potential is better patient expectation management and awareness from a simple 3 minute test that also supports your professional credentials.

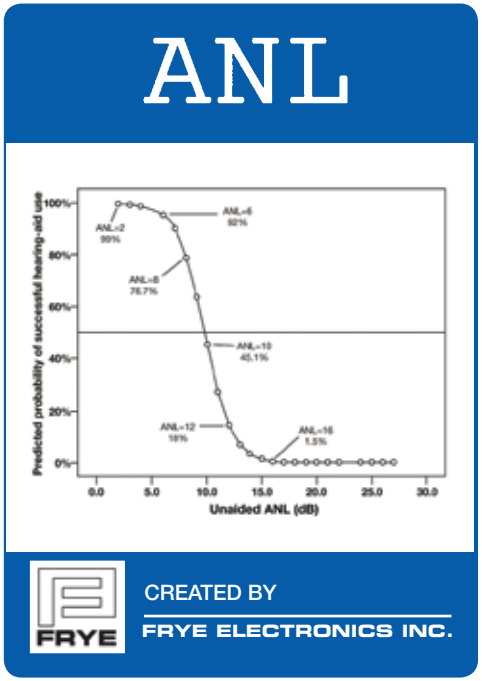
PURPOSE OF ANL

The ANL is an audiometric test that predicts whether or not a person will be a successful hearing aid user by finding out how well they tolerate noise in speech signals. Research shows that the better a person tolerates noise, the more likely they will be a successful hearing aid user.

HOW IT WORKS

- The ANL speech passage is normally presented to the patient in a sound booth using sound field speakers, but it can also be performed with headphones. The clinician determines the MCL.
- Noise is then gradually added to the speech passage in increasing levels until the patient indicates the noise reaches a level that the patient would not be willing to listen to for an extended period of time.
- The ANL score is determined by subtracting this noise level from the MCL. Patients with a low ANL score are very likely to be successful with hearing aids. Patients with a high ANL score do not tolerate noise very well and may be difficult to fit successfully without a lot of extra counselling.

* *Figure supplied by manufacturer*



It is recommended that you have:

- a sound booth that meets ANSI requirements. The speech and noise signals are typically presented using a sound field speaker at 0 degrees azimuth, although headphones can be used in a pinch.
- You will also need an external CD player and some way of communicating with the patient such as a patient response switch or a talkback microphone.

BENEFITS

- High level of accuracy: approximately 85%*.
- Quick to perform: the ANL Test typically takes only takes 2-3 minutes.
- Ability to predict whether a person will be a successful hearing aid user.

The quick and easy way to quantify a SNR Loss.

QuickSIN is the leading solution for testing speech in noise proficiency and is the most widely used system of its type. Quickly and easily measures the ability to hear noise in typical listening environments.

Useful for counselling patients regarding realistic expectations. Results can be used to make specific treatment recommendations.

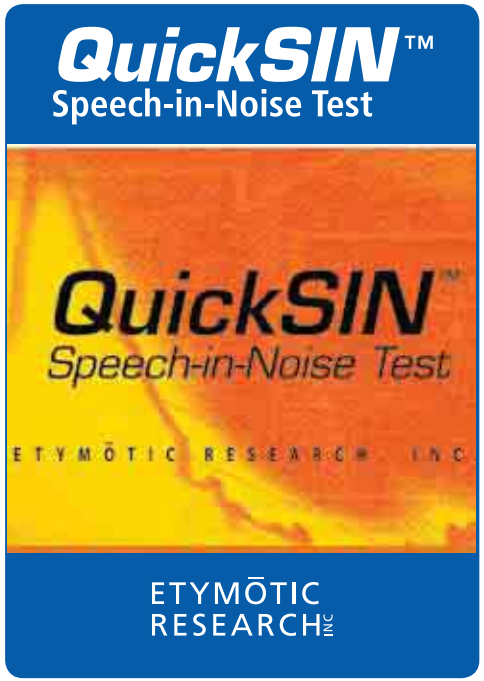
SPEECH-IN-NOISE TESTS

When being fitted with hearing aids for the first time, some people have trouble adjusting to all the new amplified noises that hearing aids provide, along with the amplified speech signals.

All of our Speech-In-Noise tests are designed to provide a quick and clinical quantification of SNR loss. The software also assists professionals in choosing appropriate amplification and other assistive technologies, managing realistic expectations in patients and can also be used in research work.

PURPOSE OF QuickSIN

The primary complaint of hearing-impaired persons is difficulty hearing in background noise, however, speech understanding in noise cannot be reliably predicted from the pure-tone audiogram or other standard audiometric tests. QuickSIN quickly and easily measures the ability to hear in noise as part of the audiometric test battery for adult patients.



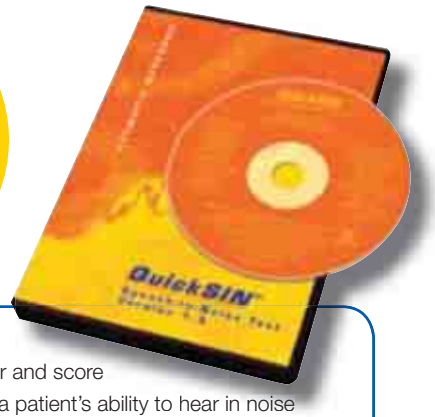
12 equivalent one-minute test for estimating SNR loss

Four-talker babble represents real world conditions not found on other speech-in-noise tests

High-pass and low-pass filtered lists for special uses

Separated speech and noises channels

BUY ONCE FOR LIFE!



BENEFITS

- Quick and easy to administer and score
- Enable clinicians to quantify a patient's ability to hear in noise
- Determine if extended high frequency emphasis improves or degrades understanding of speech in noise
- Assist professionals to make specific treatment recommendations (e.g., hearing aids, directional microphones, array microphones, FM systems)
- Demonstrate that hearing aids with directional microphones improve speech intelligibility in noise
- High face validity; patients report that QuickSIN lists sound just like the problem they have in the real world

SIN testing for complex cases.

BKB-SIN is an advanced Speech-in-Noise test especially developed for more complex cases: to estimate SNR loss with children (+5 years), cochlear-implant wearers and adults for whom QuickSIN is too difficult. It is also a one-time purchase and therefore should be considered for any battery of tests.

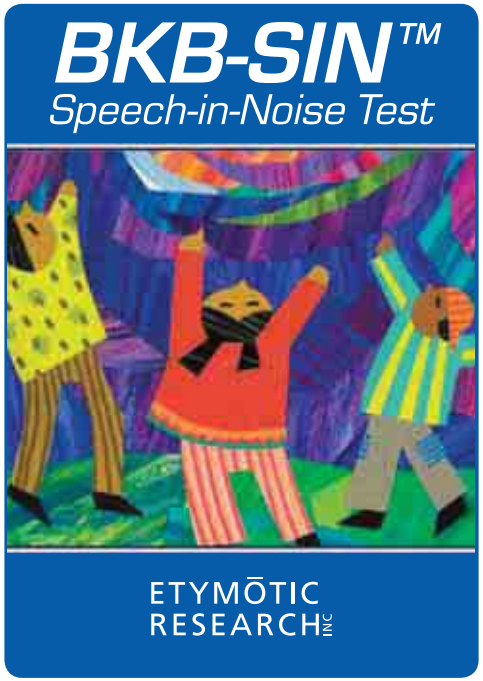
SPEECH-IN-NOISE TESTS

When being fitted with hearing aids for the first time, some people have trouble adjusting to all the new amplified noises that hearing aids provide, along with the amplified speech signals.

All of our Speech-In-Noise tests are designed to provide a quick and clinical quantification of SNR loss. The software also assists professionals in choosing appropriate amplification and other assistive technologies, managing realistic expectations in patients and can also be used in research work.

PURPOSE OF QuickSIN

The primary complaint of hearing-impaired persons is difficulty hearing in background noise, however, speech understanding in noise cannot be reliably predicted from the pure-tone audiogram or other standard audiometric tests. QuickSIN quickly and easily measures the ability to hear in noise as part of the audiometric test battery for adult patients.



18 equivalent List Pairs for estimating SNR Loss

CD1 (Standard BKB-SIN) has the target talker and background babble recorded on the same channel at pre-recorded signal-to-noise ratios

CD 2 (Split Track BKB-SIN) has the target talker and background babble recorded on separate channels

Bamford-Kowal-Bench sentences in four-talker babble

BENEFITS

- Demonstrate the advantages of amplification
- Predict performance with hearing aids in loud, noisy environments
- Assess directional microphone performance
- Estimate children's performance for soft speech
- Screen for auditory processing disorders in children
- Uses easier sentences than the QuickSIN™
- Norms for children, adults and cochlear implant users

All the patient management your business will ever need.

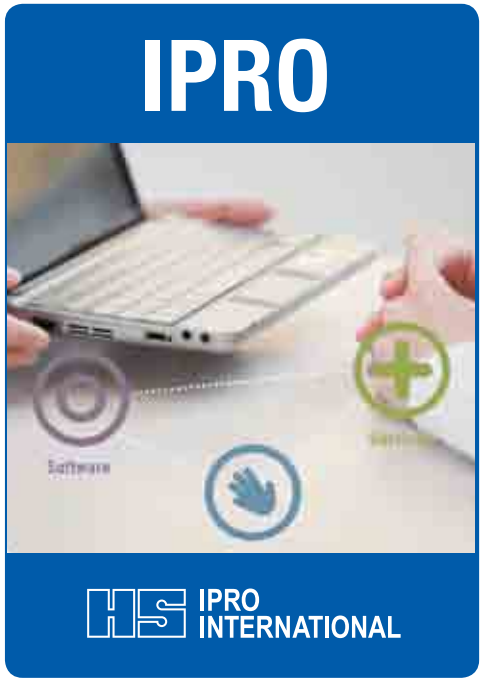
Practice management software for hearing aid dispensers. Security, scalability, a modular structure, support and connectivity: these are just some of the important factors in choosing software that enables you to increase your turnover.

IPRO-SOFTWARE

Modular, scalable and compatible. Tailor-made software for hearing aid dispensers. IPRO consultants precisely match the module combination to suit your work-flow and priorities.

BENEFITS

- Comprehensive solutions for patient management and consultation
- Fast cash entry, detailed cashbook, interface to peripherals, barcodes, financial software interface etc
- Flexible solutions for the documentation of detailed examinations and clinical records
- Professional and efficient networking for all branches
- Analysis and stock management: reports and turnover analysis, patient analysis for promotions and active sales support
- integrates with various software and hardware standards
- A sophisticated system for patient analysis for targeted and efficient promotions
- Fully integrated with NOAH 4



Modular, scalable and compatible.

Tailor-made software for hearing aid dispensers.

IPRO consultants precisely match the module combination to suit your work-flow and priorities.

Host on site for maximum security and comfort.

IPRO-SUPPORT *(cloud free)*

Active, secure and state of the art, individual support for dispensers:

- Maintenance contract
- IPRO hotline plus first class support from PC Werth
- Dial-in option to your system for error analysis and repair
- Online system care, help, updates and data services
- Training

IPRO-SERVICES

Extensive training and coaching services for:

- Optimising buying
- Developing customer potential
- Stock take support
- Methods for patient loyalty and patient acquisition
- Creating own price lists
- Certification support
- Investigating further training options
- Setting up interfaces and networks

The future of office management.

Step into the future with the new generation cloud-based office management systems from Auditdata, the leading provider of office management systems for hearing clinics in the UK.

HOW IT WORKS

With cloud computing, the software is delivered over the internet as a service. This means that you no longer have to invest in server licenses, maintenance of local servers or worry about data back-up. You only pay a low monthly fee to have access to Strato and there are no start-up costs. Storage space, integration handling, security – everything is an inherent service of cloud based systems, which means that with Strato, you can focus fully on your clients and not your infrastructure.

Strato is certified for Noah 4, which means that any Noah certified module can run on Strato. You can easily import your data from Noah 4 into Strato with no risks involved and you can export your data just as easily from Strato into Noah.

Noah 4

Internet-based cloud-based system

Certified for Noah 4

No start-up costs

Low monthly fee

Complete your professional environment.

HNN is a digital venue geared specifically towards Hearing Health Care Professionals. It is a tool used to entertain, educate and market your practice to your patients in your waiting room. The HNN platform delivers dynamic, current and contextually relevant content, customised for you and your patients on a monthly subscription basis.

HOW IT WORKS

Once your equipment is installed and your initial play list is established as outlined in our process you are a full-fledged member of the HNN community.

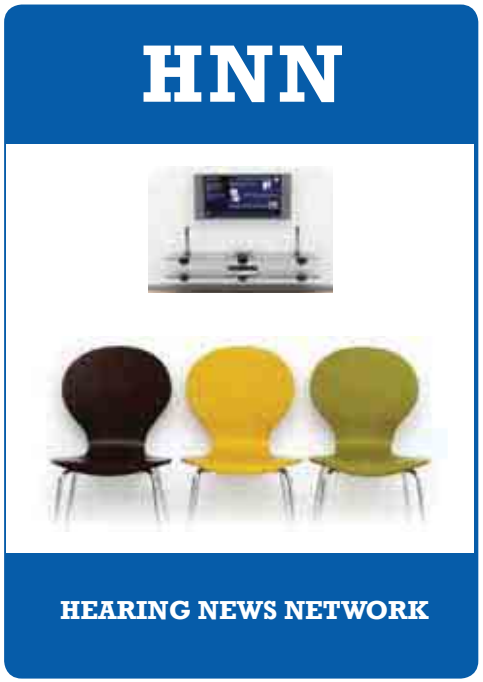
HNN is rich in contextually relevant content to precondition and educate new or existing patients, spouses, family members and/or carers as to the world of hearing health care.

Stimulate patient awareness on the latest Hearing Health Care and product options available, prompting patient discussions about the products in your dispensary.

HNN communicates the competitive advantage of your clinic so you don't have to feel like a salesperson.

BENEFITS

- Customised content for your premises
- Sharing with you ideas and messages that are used by other Hearing Health Professionals
- Providing a monthly newsletter to advise you of updates and/or common trends
- Creating a stronger connection between your patient and you - bringing more clarity and relevance to "in-lane" discussion
- Establishing an informed patient to increase the effectiveness of your recommendations.



Easy to use platform for education and awareness

Increase the quality of dialogue between patient and hearing health care professional

Increase patient confidence in the value and benefit of making their purchases with their hearing health care professional

Content runs on a twenty minute cycle

AUDIOLOGY

equipment

Instruments for Audiology

P.C. Werth Limited is a market leader for audiometers and audiological instruments in the U.K. and Eire and is recognised by audiological professionals worldwide. Established in 1947, we have grown and diversified to support the Private, NHS, Educational and Occupational Health sectors, where we are renowned for quality, service and the latest innovations.

Our unique experience means that we are a long-standing and exclusive UK partner to the world's leading manufacturers, providing a full calibration, service, test and repair on all our audiological instruments.

Our Regional Managers are on hand in the UK and Eire to demonstrate and advise on the most appropriate products and can offer full training and sales support.

Our Quality Management System is independently audited by Lloyd's Register Quality Assurance Ltd. and is reviewed every 9 months.

Sound Level Meters

QUEST DIGITAL SLMS AND BIO ACOUSTIC TESTERS

Full range of digital SLMs and Bio-Acoustic testers from Quest Technologies from Basic Type 2 for general purpose applications to Precision Type 1 SLMs with octave band filters for the most complex applications. Please contact us for the full range offered.

Typical Applications:

- Occupational Noise Measurements
- Noise Ordinance Enforcement
- Community Noise Assessment
- Fire & Emergency Notification Alarm Testing
- Maintenance Inspections & Trouble-Shooting
- Environmental Impact Studies

Key Features: Basic Sound Level Meters:

- Easy to Use
- Large Liquid Crystal Display
- Simple One-Button Field Calibration
- On-Screen Overload Annunciator
- Integral AC and DC Signal Outputs

(Excludes SoundPatrol meter)

- CE marked for EMI & RFI Emissions and Susceptibility
- Class/Type 1 or Class/Type 2 Accuracy
- Intrinsic Safety Approvals
- Integral Tripod Mount
- Attractive Weight and Size
- Convenient 9V Alkaline Power Source

KAMPLEX KM-2 MINI SOUND LEVEL METER

For quick and easy checking of background sound levels in consulting rooms, school classrooms, offices, workshops, etc. Pocket size, with LCD display and robust professional construction. Uses standard 9VPP3 battery.

- Instant switch on/off
- Maximum and minimum sound level readings over time
- Tripod thread for fixed readings
- Removable washable windshield
- Auto power off
- dBA weighting
- Measuring range: 35~100dB
- Frequency range: 31.5Hz ~ 8KHz
- Accuracy: +/- 3.0dB (ref 94dB @ 1KHz)
- ½" electret microphone
- Measuring resolution: 0.1dB
- Display refresh rate: 0.5sec
- Time weighting: FAST (125mS)

KAMPLEX KM-6 DUAL FUNCTION SOUND LEVEL

Quasi-analogue display – ideal for paediatric testing. For sound measurements in speech and audiology clinics, noise reduction schemes, offices, factories, schools, colleges, etc. LCD display with white backlight and robust professional construction. Uses standard 9V PP3 battery.

- IEC61672-1/ANSI S1.4 Class 2
- Bar graph and digital readings
- Maximum and minimum sound level readings over time
- Data recording functions
- Tripod thread for fixed readings
- Removable washable windshield
- Auto power off
- dBA and dBC weighting
- Measuring range: 35~130dB
- Level ranges: 30~80dB, 50~100dB, 80~130dB, 30~130db
- Frequency range: 31.5Hz ~ 8KHz
- Accuracy: +/- 1.4dB (ref 94dB @ 1KHz)
- Dynamic range: 50dB
- ½" electret microphone
- Measuring resolution: 0.1dB
- Display refresh rate: 0.5sec
- Time weighting: FAST (125mS); SLOW (1 sec)

Screening & Occ. Health Audiometers

PC Werth
Advanced Sound Technologies

Comprehensive with AMC database

Kamplex BA25

Compact and lightweight, the Kamplex BA25 fully satisfies the requirements of serial audiometery in an industrial or occupational health environment.

Providing unrivalled flexibility, the BA25, with the Audiometric Management Centre (AMC) database and a laptop PC, becomes a completely portable test station.

- Auto-threshold, Békésy and manual audiometry
- Comprehensive database(AMC)
- User configured profile questionnaire (AMC)
- On-site training included
- Optional calibration checker
- Lightweight case included

Kamplex

Fully automatic with HSE categorisation

FIM Audiolyser® ADL-20 Occupational Health Screener

Ultra-portable automatic audiometer - for fast screening in busy environments

- Unique Occupational Health audiometer with space-saving design
- Compact, comfortable, portable, lightweight and easy for subject to operate
- Fast, accurate automatic and manual tests
- Continuous or pulse tone
- Inbuilt HSE and ISO 7029 Categorisation for fast comparison with predicted values
- PC-based audiometer powered from USB port
- Eleven frequencies: 125Hz to 8000Hz
- Automatic voice instructions direct to subject via earphones
- Export results via ASCII Text, Excel, FTP or IO Data
- Print direct to PC printer
- Customisable keyboard settings for manual testing
- Class IV audiometer
- Complete system includes: Audiolyser® ADL-20 audiometer integrated in 3-metre cord with USB connection, AudioWin® 20 software, printed User Guide, TDH39 headset and earphones, soft protective case.
- Full database included
- Multiple databases allowed
- Comparison of audiograms over time

FIM Medical

Now compatible with AuditBase and Practice Navigator

Wireless & ultra portable

OTOVATION AMPLITUDE T4

The Amplitude T-Series models have an integrated patient response switch and operate wirelessly from your Windows PC. The T4 offers automated and manual air conduction testing features.

- Wireless air conduction testing
- Flexible manual and automated testing
- Rechargeable battery or mains power
- Portable and convenient for on-the-go testing
- DC power adapter
- E5A insert phones
- USB Bluetooth adapter

Options:

- TDH 39 Headphones
- Carrying case

Screening Audiometers

PC Werth
Advanced Sound Technologies

Dependable & portable screening performance

MAICO MA25 &MA25e*

Easy, mobile basic screening air-conduction audiometer. Stand alone and mobile. Battery operated, small lightweight and portable. Class 4.

- New features combined with a fresh design
- Air conduction with 11 frequencies from 125 Hz to 8 kHz
- Customise the frequencies according to your own needs
- Intensities from – 10 dB HL to 100 dB HL in steps of 5 or 1 dB
- Pure, warble and pulse tone
- Independent with battery or eco-friendly with power supply
- Ideal for use in schools, industry and anywhere fast hearing valuations are performed

* MA25 E - includes automatic Hughson-Westlake tests
Talk-forward function makes MA25E easy to work with in sound booths

MAICO

Picture and tone audiometry

MAICO PILOT HEARING TEST

Fast and fun hearing test device for children from 2-7 years. Screening audiometer with tone and select picture audiometry, especially designed for paediatricians. Class 4

- The new PILOT TESTS – for fast hearing tests for children over 2 years
- Small and lightweight with integrated pure tone audiometer
- Fast, self-motivating test takes less than one minute per ear
- Graphical LCD-display shows picture of the test word
- Up to 6 different languages stored in the instrument
- High quality speech tests in many different languages available
- Ideal for use in schools

MAICO

Automated screening & no PC required

MAICO MA30

The “talking audiometer”. – automatic screening audiometer for tone audiometry. Runs tests on its own, while voice prompts give the patient instructions. Class 4.

- Manual and automatic pure tone audiometry
- Automatic threshold tests according to Hughson Westlake
- Screening test at 30 dB in less than 2 minutes
- Frequencies freely selectable
- Stores up to 200 audiograms
- Optional thermal printer

Advanced Sound Technologies

MA41LT

Not only at the forefront of ergonomic design, the MA41LT also sports high performance and a large LCD colour screen. Frequency controls have been placed at a comfortable shoulder distance apart, to the edge of the instrument and at a natural orientation for operators' hands. This improves user comfort and keeps the screen clear and easy to read. In addition, the 'present' buttons fall beneath the operator's thumb, ensuring a discreet presentation and less false positive results.

- Light and portable
- Air conductipn: Level range -10 to 120 dBHL
- Bone conduction: Level range -10 to maximum 80dBHL
- Free field testing: Level range -10 to maximum 90 dBHL with internal amplifier and optional passive external speakers (max 110dBHL)
- Pure, pulse and warble test signal tones
- Test frequencies: 125- 8000 Hz
- Masking signals: narrowband and speech noise
- Tone tests: HL, UCL, Aided
- Speech tests: None
- Hi res LCD display 640 x 480 pixels
- DD45 headphones
- Stand alone

PC based for flexibility and performance

MAICO MA33 BC & MA33 SPEECH*

Small, fast, lightweight PC-based audiometer for fast and reliable tone audiometric screening appropriate for children and adults. Class 4.

- Air conduction and bone conduction
- Stenger and automatic Hughson Westlake test available
- Intuitive handling of the clearly presented user interface
- Operate at your convenience with your mouse or keyboard
- Small, fast, flexible and high mobile
- Display and store your results in one second
- Includes MAICO Patient database
- Easily expendable to future developments
- Ideal for ENT specialists, general and occupational health practitioners

* Includes speech tests with recorded speech test material from various sources and via speech microphone

* SISI test function and speech audiometry.

Wireless & portable. Ideal for domicillary visits

Programs hearing aids wirelessly!

OTOVATION OTOPod M1/M2

A new and enhanced wireless and portable diagnostic audiometer. OTOPod M2 adds hearing aid programming capability for Widex hearing aids. Includes enhanced versions of Symphony and Symphony NOAH module software and new OTONet Wireless Adapter for improved patient communications and streamlined device connection. M2 includes Proglink to wirelessly program the latest Widex hearing aids.

- An enhanced user interface and control panels for air, bone, and speech testing
- Semi-automated testing for air and bone conduction
- OTONet Wireless Adapter improves patient communication
- User selection of audiogram plotting symbols
- Tone MCL and UCL
- ISO 7029 normative curves
- Faster and easier installation on Windows XP and Windows Vista
- Ideal for mobile, peripatetic and domiciliary work
- A variety of enhancements and new parameters for additional flexibility in testing
- M2 supplied with Proglink for wireless programming

Otovation

MA41

Not only at the forefront of ergonomic design, the MA41 also sports high performance and a large LCD colour screen. Frequency controls have been placed at a comfortable shoulder distance apart, to the edge of the instrument and at a natural orientation for operators' hands. This improves user comfort and keeps the screen clear and easy to read. In addition, the 'present' buttons fall beneath the operator's thumb, ensuring a discreet presentation and less false positive results.

- Light and portable
- Air conduction: Level range -10 to 120 dBHL
- Bone conduction: Level range -10 to maximum 80dBHL
- Free field testing: Level range -10 to maximum 90 dBHL with internal amplifier and optional passive external speakers (max 110dBHL)
- Pure, pulse and warble test signal tones
- Test frequencies: 125- 8000 Hz
- Masking signals: narrowband and speech noise
- Tone tests: HL, UCL, Aided
- Speech tests: SRT, WRS, UCL, Stenger
- Hi res LCD display 640 x 480 pixels
- DD45 headphones
- Stand alone or computer interface

PRIMUS AUD

Primus AUD, part of the Real Ear Fitting System, is a PC based audiometry module providing a wide range of possibilities within pure tone audiometry, bone conduction audiometry and speech audiometry including your choice of inserts or headsets with an option of high frequency testing. Hence everything you need to offer audiometry for real. The Primus AUD includes the Primus Fitting Unit and the unique Primus Inserts that are easily replaced without any system downtime. Additional transducers for high frequency and bone conduction are available.

- Full featured audiometry
- Future proof fitting system
- Predefined workflows for easy navigation
- Professional counselling
- Innovative client view
- Compatible with Noah3 and certified office management systems
- Fully portable with laptop/permanent installation

Fast and dependable tympanometry

MAICO MI24 & MI24C*

Fast, fully automatic audiometer for impedence testing and ipsilateral reflex tests with integrated printer.
Class 2.

- Ergonomic design – easy, comfortable to operate
- Adjustable probe with integrated right/left selection button
- Fast, automatic test (only 3 seconds for one tympanogram)
- LCD screen displays tympanogram and test results immediately
- Graphical realtime reflect display
- Memory stores test results for both ears
- Fast, virtually silent printout of test results
- Ipsi-and contralateral (option) reflect test with 4 frequencies
- With additional contralateral reflex tests

MAICO

Excellent value audiometer/ tympanometer

MAICO MI26C

A combined tympanometer and AC audiometer with fast automatic testing, ipsi and contralateral reflex testing.
Class 2.

- Integrated audiometer, AC with 8 frequencies
- Fast, automatic test
- Ipsi and contralateral reflex test with 4 frequencies
- Adjustable probe with integrated right/left selection button
- LCD screen displays tympanogram and test results immediately
- Graphical realtime reflex display
- Memory stores test results for both ears
- Fast, virtually silent printout of test results

MAICO

Advanced screener functions

MAICO MI34 & MI34H*

Automatic, middle ear analyser for impedance, ipsi and contralateral reflex testing, reflex decay and ETF testing.
Class 2.

- Fast, automatic tests – tympanogram in 3 seconds
- Ipsi and contralateral reflex testing with 4 frequencies
- Reflex decay testing
- Eustachian tube function test for intact and perforated eardrums
- Handheld, adjustable probe for diagnostic and screening purposes
- Graphical realtime display
- Fast, virtually silent print-out of test results

* MI 34 H with 1000 Hz high frequency probe tone for testing newborns and young children

High frequency diagnostic tympanometry

MAICO MI44

Middle ear analyser for impedance and reflex measurement with additional diagnostic functions. Class 1.

- Manual and automatic pump control
- Tympanometry with selectable pressure ranges and pump speeds
- Ipsi and contralateral reflex tests – now with tone and noise
- Reflect decay test and ETF test for intact and perforated eardrums
- High frequency probe tones: 678 Hz, 800 Hz, 100 Hz
- Exchangeable probe insert for screening and diagnostic use
- USB pc interface

MAICO

Perfect for Paediatrics

MAICO RACECAR & RACECAR AUDIOTYMP*

Tympanometer designed to test children. Impedance and reflex screening with animated game-like testing to keep the child's attention. Class 2.

- Impedance measurement for children – game-like testing
- Colourful design gives the instrument a fun look
- Animated car race keeps the child attention
- 1000 Hz High frequency probe tone for small children
- Full automatic test sequence – a tympanogram takes a few seconds
- Stapedius reflect test with 4 test frequencies
- Includes pure tone audiometry with 8 test frequencies

MAICO

Fast & easy to use Fantastic value

MAICO EASYTYMP

Portable handheld impedance screener with optional high frequencies & integral printer.

- Latest single-handed rechargeable cordless tympanometer.
- Weighs just 417g.
- Fast automatic impedance tests.
- Easy to operate with comfortable ergonomic design.
- 226Hz probe tone. Option for 1000Hz.
- Just 3 seconds per tympanogram.
- Bright LCD screen displays tympanogram and test results immediately.
- Graphical realtime reflex display.
- Test results for both ears stored in memory – up to 250,000 tests.
- Optional external probe extension facilitates paediatric use.
- PC integration via USB port.
- Integrated thermal printer in docking station for fast printout.
- Automatic printing option when unit docked

PRIMUS Real Ear Fitting System

Real Ear

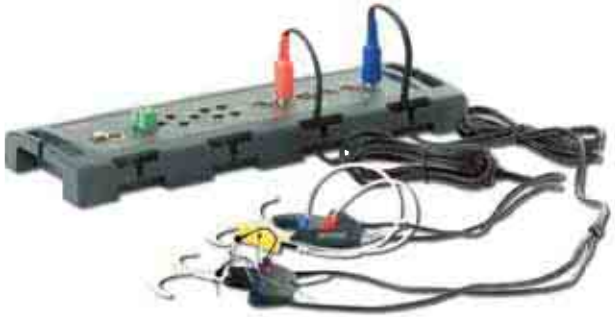
PRIMUS REM

Primus REM, part of the Real Ear Fitting System, offers classic Real Ear Measurements as well as comprehensive Speech Mapping measurements, where all measurements include high frequency testing. The classic Real Ear Measurements, which can be performed by Primus REM, include: Unaided, Occluded and Aided Response as well as Insertion Gain. Toggling between SPL and Gain shows the response measurements in gain view. Speech Mapping measurements can be predefined and customized for optimal Hearing Instrument fine adjustments, Client counseling and demonstrations. The measurements are supported by a large sound library including technical sounds, daily life sounds, speech signals and dialogue.

- Classic Real Ear Measurement and VSM
- Full test battery
- Future proof fitting system
- Predefined workflows for easy navigation
- Professional counselling
- Innovative client view
- Compatible with Noah 4 and certified office management systems



Real Ear

PRIMUS AUD

Primus AUD, part of the Real Ear Fitting System, is a PC based audiometry module providing a wide range of possibilities within pure tone audiometry, bone conduction audiometry and speech audiometry including your choice of inserts or headsets with an option of high frequency testing. Hence everything you need to offer audiometry for real. The Primus AUD includes the Primus Fitting Unit and the unique Primus Inserts that are easily replaced without any system downtime. Additional transducers for high frequency and bone conduction are available.

- Full featured audiometry and VSM
- Future proof fitting system
- Predefined workflows for easy navigation
- Professional counselling
- Innovative client view
- Compatible with Noah 4 and certified office management systems
- Light and portable
- Air, Bone and Free Field testing
- Frequency range 125 Hz to 16kHz
- Pure tone, modulated tone, narrowband noise, white noise, speech-weighted noise, and pink noise
- Tone tests: HTL, MCL, UCL, BCL, FF, FF-A
- Tone: IEC 60645-1 / ANSI S3.6 Type 1, Speech: EN 60645-2 / ANSI S3.6 Type A or A-E

Real Ear

PRIMUS HIT

Primus HIT, part of the Real Ear Fitting System, offers full- featured technical measurements for testing and troubleshooting hearing instruments. The test can be run as an automatic test sequence in accordance with international standards. The HIT unit is powered by a USB connection from the PC and can be placed at the most convenient working place. The HIT unit supports both IEC and ANSI standards.

The Real Ear Fitting System instantly loads all past measurements when a customer is presented on screen, giving you access to all historical data.

- Full featured hearing instrument testing and troubleshooting
- Automated test sequences
- Predefined workflows for easy navigation
- Innovative historic overview
- Compatible with Noah 4 and certified office management systems

Hearing Aid Analysers and Fitting Systems

PC Werth
Advanced Sound Technologies

Directional microphone testing. Outstanding REM & HIT testing accuracy. No PC required

AUDIOSCAN VERIFIT

Comprehensive hearing aid test system/real ear analyser with large clear display. Complete protocol for fitting and testing digital instruments with the instrument fully programmed and active. Dual probe modules for quick evaluation of binaural fittings. Incorporates Viewport™ featuring Speechmap® for patented directional, unique noise reduction and feedback suppression tests.

- True 2-channel measurements
- Single/dual view display options
- External monitor capability
- Sensory Loss Simulator™
- Occlusion effect test
- Battery simulator
- RECD transducer
- Probe monitor
- Telecoil test
- Manual gain, output, distortion tests

audioscan

The choice of research departments, hospitals and manufacturers

Unique stand combines the on-ear speaker and probe microphone cable management. Stand adjusts to both foor, and table-top height.

audioscan

AUDIOSCAN AXIOM

The perfect system to counsel: Captivate, educate and motivate patients with this full function fitting system. The simple and intuitive fitting process works with audiologist and user to provide accurate and clear hearing and intelligibility targets, using REM, HIT and VSM.

Axiom is a stand-alone unit, protecting it from PC downtime and reliability issues. Plug and play with standard PC monitor.

- Just 3 tests to improve fittings
- Perfect for counselling patients
- Clear visual reinforcement
- Demonstrate and compare actual target hearing
- Sensory loss simulator to educate and the “significant other”
- Sturdy aluminium build
- Unique probe & free-field speaker design
- NOAH compatible
- RECD
- DSL, NAL or Camfit targets
- Tests:
  - *Speechmap (R) Ensure speech is audible, comfortable and intelligible*
  - *Audibars (TM) Speech Intelligibility Index scores before and after fitting*
  - *Real Ear Unaided, Aided & Occluded Response*
  - *Real Ear Insertion Gain*
  - *Speechmap*
  - *Gain*
  - *Frequency response & range*
  - *Equivalent input noise*
  - *Output, gain & distortion*

audioscan

Lightweight, compact & portable. No PC required

AUDIOSCAN RM500 SL

Hearing Instrument Fitting System which is portable and extremely lightweight in its integral aluminium case. Offers comprehensive real-ear and hearing aid test box measurements with colour display.

- 12.1” colour display
- Battery drain test
- Built-in telecoil test
- Sensory Loss Simulator
- Easy to use keypad
- Open fit protocol for valid and accurate open fittings
- DSL®5 and NAL-NL1 fitting methods
- Choose from calibrated real speech, tone, or noise stimuli
- Valid for all types of instruments and fittings including open type fittings
- Easily re-enter audiometric data using the optional scanner

CALIBRATION

services

Service, Calibration & Repair Services

Repair, Service, Calibration and Testing

PC Werth provides the solution to the complexity of integrated chip technology which is at the heart of all audiological instruments, resulting in increasingly sophisticated operating software, product interfaces and product servicing. We keep pace with the latest developments in technology by working in conjunction with OEMs to offer full repair, testing and calibration facilities for all our products.

Quality Certification

We take pride in our quality management system, using it to advance our performance and service. This is reflected in our Quality Certification, regularly and independently audited by Lloyd's Register Quality Assurance Ltd. Supply, testing, calibration and final inspection of equipment and instrumentation for audiology, hearing care and conservation, noise and personal vibration measurement and environmental monitoring is certified to BS EN ISO 13485. Approval Certificate Nos: 925358/A & 925358/B

Acoustic Solutions

ABSORBATONE™ FOAM ACOUSTIC SOUND ABSORPTION WALL PANELS

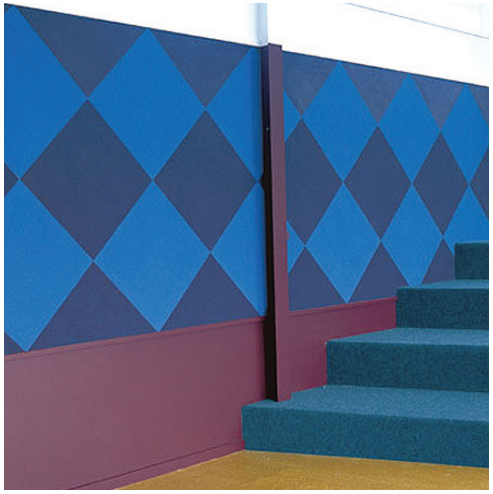
IAC Absorbatone™ is a cost effective range of fabric covered foam acoustic absorption panels specifically designed to reduce echo and control reverberation times within buildings. Absorbatone™ can also be applied to existing booths and rooms, improving the overall acoustics and aesthetics. Once fitted, Absorbatone™ panels create a pleasant acoustically enhanced environment and can greatly improve speech intelligibility. Panels can also be custom manufactured in any size up to 1200mm x 2400mm in thicknesses of either 25mm or 50mm.

- BB93 compliant
- Cost effective solution
- Attractive finish
- Quick and easy installation
- Standard and bespoke sizes available
- Not susceptible to fibre migration
- Lightweight
- Ideal for:
  Hearing Test Rooms, Meeting Rooms, Lecture Theatres / Concert Halls, Education Establishments, Sports Halls, Offices

HUSHH-UPS®

Hushh-Ups® the brilliant Canadian invention that has helped teachers all over America to reduce noise distraction, allowing more of what they say to be heard clearly. Any classroom with hard flooring and noisy chairs will benefit from this simple, effective & economic solution.

- Cut classroom chair noise to barely audible!
- Reduces noise distraction, improves results
- Simple to fit with instant results
- Hygienic and safe - latex-free formulation
- Cost effective - 25% discount for full classroom sets
- A great add-on to Soundfield systems



HUSHBOARDS®
Including annual healthchecks, noise and reverberation measurements

These tough, colourful felt-like boards are a simple, flexible and economical acoustic solution for any classroom. As well as reducing noise reverberation by up to 40%, the Hush-Boards also create attractive and practical pin-board displays that are easily fixed to most walls, beams and partitions. Available in any quantity and in a range of attractive colours they can be easily combined to form small or larger wall panels.

- Effective - reduce noise reverberation by up to 40%
- Tough, felt-like boards double up as pin-board displays
- Mix & match panels to create your own unique display
- Economical - purchase as many or as few as you like

ACOUSTIC REVIEWS
Including annual healthchecks, noise and reverberation measurements

Auditoriums, halls, classrooms etc can be very noisy places, but you can improve your conditions and environment by managing and maintaining signal noise ratio. We can help you with a simple appraisal of your particular environment, providing a general overview of any noise and reverberation issues and suggesting a number of cost effective solutions to be sure your conditions are right.

Our health checks can help provide peace of mind, by ensuring your systems stay reliable and correctly configured for their environment. Health checks include:

- Full functionality check
- Product check, optimisation, review
- Configuration, installation and acoustics check

To book your acoustic review or a healthcheck call our Hearing Team on 020 8772 2700

PC Werth

HEARING

and communication solutions

Personal Hearing & FM Solutions

Hearing aids today face two major challenges: entertainment and multimedia connectivity in the home and an increasingly noisy environment. Even the very latest hearing aids can struggle in poor SNR conditions.

And with so many years of experience, PC Werth appreciate that not everyone is ready for a hearing aid. Sometimes greater flexibility and less commitment is an appropriate or interim solution.

We have therefore created a range of ear-level and neck-loop based systems that can both enhance hearing aid performance/ connectivity or simply provide a low cost, low commitment answer to everyday hearing challenges.

- **Communicators & ALDs**
- **Telephones**
- **TV and Listeners**
- **FM Solutions**

Digisystem

Comfort Audio
HEAR THE FUTURE

The world's most advanced Personal FM System and communication solution.

Comfort Audio Digisystem can be used in the classroom or the work place to overcome the effects of distance and competing noise in communication situations.

SecureStream Technology

A unique digital wireless transmission system, specially developed by Comfort Audio to give you 300% better dynamics than conventional FM.

PSE **Perceptional Speech Enhancement**

- Unique digital audio processing technology enhances speech and filters out distracting background noise
- Result of 20 years research into audio processing algorithms

FFC **Free Frequency Check**

- All units with an LCD display will tell you which frequencies are available for use

FCR **Free Channel Request**

- Prevents pupils disturbing each other when many microphones are in use in one classroom. The transmitter can only be activated when the channel is free.

Bluetooth®

PC Werth
Advanced Sound Technologies

www.pcwerthstore.co.uk

THE WORLD'S MOST ADVANCED PERSONAL FM SYSTEM

Comfort Audio Digisystem can be used in the classroom or the work place to overcome the effects of distance and competing noise in communication situations.

Using a Comfort Audio system makes communication easier because the signal is delivered directly to the receiver at a consistent volume level regardless of the distance.

Comfort Digisystem consist of two parts: a Digital transmitter for the speaker and a Digital receiver for the recipient. The microphone and transmitter pick up the speaker's voice and send it wirelessly via digital radio directly to the receiver. The signal is then transferred from the receiver to the users hearing instrument/sound processor via direct input or neck loop/t-coil.

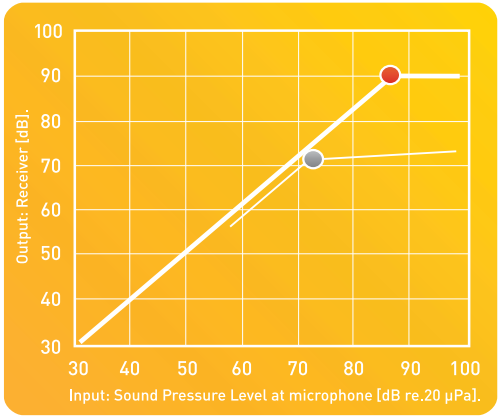
Comfort Audio
HEAR THE FUTURE

- Digital Wireless sound transmission
- Minimal radio transmission noise
- Clearer reception in noisy situations - 20dB better than existing FM technology
- Improved audio bandwidth
- Improved operating distance
- Less drop outs
- Secure signal (no eavesdropping)
- Without a time lag
- SST, digital technology for ALDs
- Cochlear implant compatible

Comfort digisystem AWARDED Best New Product! 2011 Audiology NOW!

PC Werth
Advanced Sound Technologies

- **No interference**
- **100% digital technology**
- **Clearer digital sound**
- **Easy to use**
- **Advanced in-home connectivity**
- **Attractive stigma-beating design**



Source: Delta Teknisk-Audiologisk Laboratorium, Denmark and internal measurement method.

Digisystem (red dot) demonstrates better signal to noise ratio and sound output compared to other systems (grey dot). Digisystem does this over a wider range of frequencies giving a more pleasurable and realistic sound at higher frequencies, which assists communication.

PC Werth
SOUNDFIELD
systems

Soundfield & PA Systems

Clear communication is a simple concept, but tricky in a class of 30. Soundfield from P.C. Werth makes classes quieter, more manageable and more focused, using only the power of a teacher's voice.

It also works in adult seminar or meeting rooms too...

IF YOU CANNOT SEE WHAT YOU REQUIRE IN THIS SECTION PLEASE CALL US ON 020 8772 2700

Introducing Soundfield

PC Werth
Advanced Sound Technologies

Our Soundfield systems cut through barriers to communication in classes and seminar rooms. PC Werth Soundfield installation is a simple technology for effective communication in schools, seminars and conference situations.

Clear communication is a simple concept, but a tricky reality in a class of 30. This is why thousands of teaching professionals rely on P.C. Werth to deliver a quality of sound that makes classes quieter, more manageable and more focused.

Focusing on mainstream, adult and special education as well as training facilities, we are committed to enhancing sound and acoustics for everyone in group situations, rooms or halls.

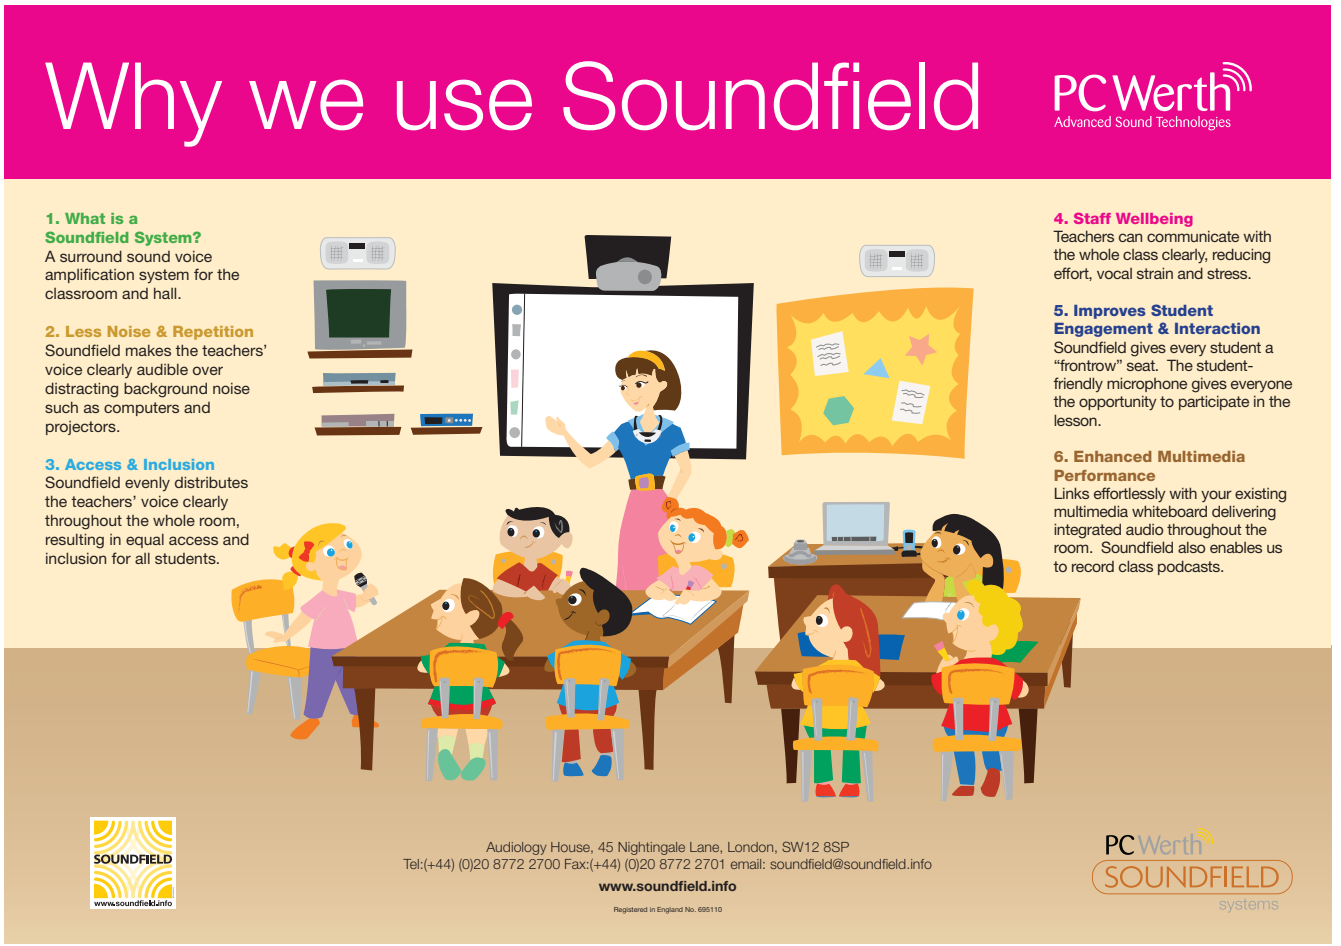
Soundfield. The power of speech.

Soundfield is a wonderfully simple concept: easy to install and operate, economical in daily use and effective from the moment you switch it on. True soundfield uses specialist speakers and speaker positioning that delivers speech signals equally to all pupils in the classroom, no matter where they sit or what direction they are facing.

In trials and use, soundfield has been shown to contribute to:

- **Better comprehension & learning**
- **Less noise & disruption**
- **More inclusion**
- **Reduced talker fatigue, stress & vocal strain**
- **More participant engagement & interaction**
- **Enhanced multimedia performance**
- **OFSTED friendly**

Podcasting is easy with Soundfield



Why we use Soundfield
PC Werth
Advanced Sound Technologies
1. What is a Soundfield System?
A surround sound voice amplification system for the classroom and hall.
2. Less Noise & Repetition
Soundfield makes the teachers' voice clearly audible over distracting background noise such as computers and projectors.
3. Access & Inclusion
Soundfield evenly distributes the teachers' voice clearly throughout the whole room, resulting in equal access and inclusion for all students.
4. Staff Wellbeing
Teachers can communicate with the whole class clearly, reducing effort, vocal strain and stress.
5. Improves Student Engagement & Interaction
Soundfield gives every student a "frontrow" seat. The student-friendly microphone gives everyone the opportunity to participate in the lesson.
6. Enhanced Multimedia Performance
Links effortlessly with your existing multimedia whiteboard delivering integrated audio throughout the room. Soundfield also enables us to record class podcasts.

Soundfield: What to Look For

PC Werth
Advanced Sound Technologies

Our systems are the perfect way to improve speech intelligibility, signal to noise ratio and coverage. Features include power management and a unique anti-feedback technology to improve useability and performance. Designed for the simplest use, Soundfield is compatible with all ICT installations, active whiteboards and multimedia technologies for podcasting.

Soundfield beats the effects of:

1. DISTANCE

Audibility dramatically decreases as the distance from the speaker increases. Students seated in the front row of a typical classroom receive about 83% of your speech "signal." That figure drops to 66% in the middle row and just 55% at the back of the class. **Soundfield means all students hear you like they are all in the front row.**

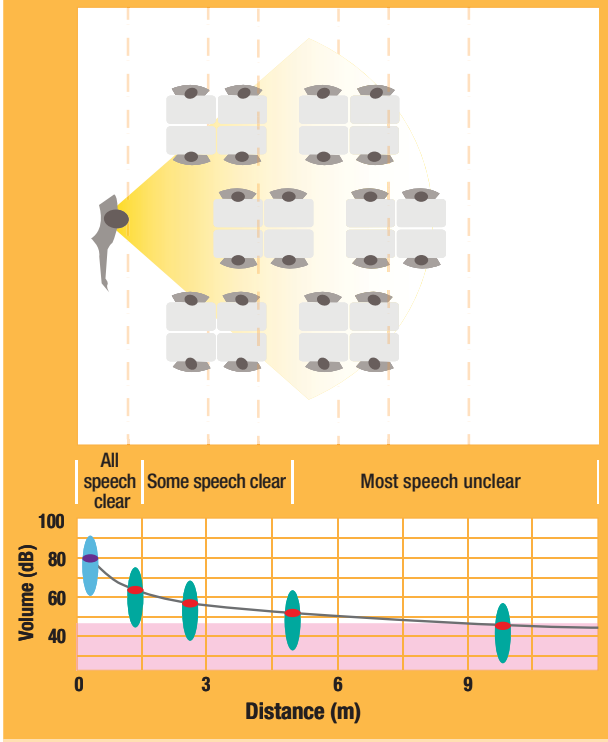
2. NOISE

Noise from chatting classmates, projectors, PCs, rattling furniture, other classes and external traffic can all increase background noise. As background noise levels can reach 50 decibels or more - about the same as a busy street - so communication in class becomes severely compromised. And because a teacher's comfortable speaking volume is not much higher than this, it's easy to see how students routinely have trouble distinguishing everything their teacher says over background distractions. **Soundfield raises your voice over background noise without effort or strain.**

3. REVERBERATION AND ECHO

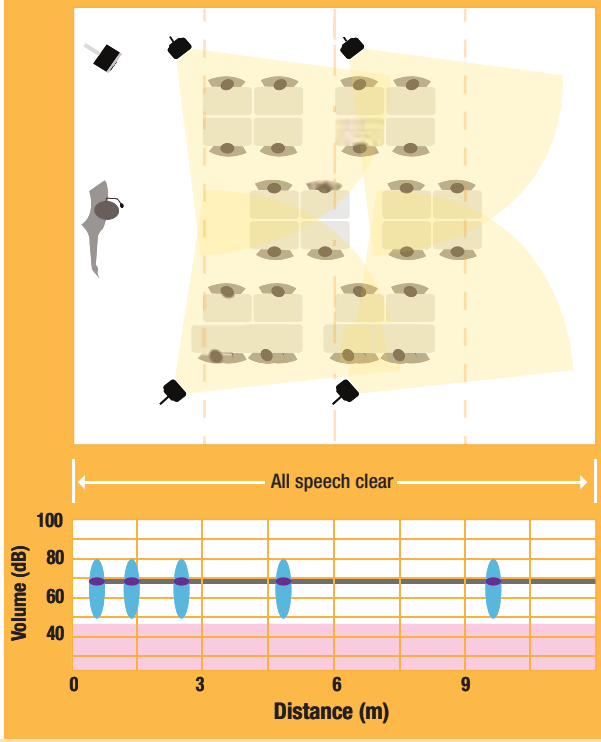
The smooth desks, high ceilings, windows and uncarpeted floors common to many of today's classrooms reflect and amplify all kinds of distracting noise. This reverberation and echo has a dramatic impact on speech understanding as background noise levels increase further and vital speech cues are masked by fragments of earlier sentences. **Soundfield ensures what you say can be heard.**

Without Soundfield



- Teacher's voice rapidly drops off with distance
- Background noise masks teacher's speech
- Even the closest pupils may not hear all speech correctly
- "Seat lottery" disadvantages pupils furthest from teachers
- Pupils just 5m from teacher will not hear around half of what is said
- Speaking louder cannot compensate fully and causes personal stress and vocal strain

With Soundfield



- Teacher uses conversational speech volume and tones
- No drop off with distance
- All pupils hear equally well
- Reduced personal stress and vocal strain
- Speech is always intelligible over background noise
- Teacher is free to move and to position pupils

Pink area = background noise level, Black line = average intensity of speech sounds, Blue ovals = actual range of intensity of speech sounds

Soundfield: FrontRow Pro Digital

FrontRow Pro Digital

Digital infrared Soundfield System. The world's first digital infra-red Soundfield system delivers clear, consistent speech free from feedback and interference. Larger schools can install an unlimited number of systems in the knowledge that FrontRow Pro Digital will operate problem-free even in close proximity to other broadcast technology. FrontRow Pro Digital is robust, very simple to use and, thanks to its intelligent power management, very economical.

frontrow™ pro digital

FrontRow Pro Digital

Standby mode uses 73% less energy than comparable analog systems and allows "one-touch" operation.

Powerful ADAPTO® digital platform optimises sound quality and power use.

Auxiliary audio inputs and output allow for seamless integration with other audio-visual equipment and enables podcasting.

Available with

Ceiling speakers
A great choice for faithful reproduciton of voice and music.

Wall speakers
A great choice for faithful reproduction of voice and music.

UNIQUE
IR Speaker units
Full sound coverage of a standard four-speaker system with about half the installation time.

Student Mic
Child friendly pass around mic for increased participation

Use for

- Mainstream classes
- Hearing impaired student inclusion
- Multimedia and rich content
- Ugrading active whiteboards
- Classes prone to feedback
- Pupil engagement
- Teaching assistants

THE PERFECT ALL ROUNDER
NOW WITH UNIQUE IR SPEAKER TECHNOLOGY

FrontRow Symbio

Many classrooms have a basic amplifier and speakers - perhaps as a component of an interactive whiteboard - but lack the critical ability to amplify voices.

Easily add voice clarity to any existing amplifier with the FrontRow Symbio. It's the only wireless infrared receiver that offers the FrontRow microphone - a simpler, smarter, 30% lighter mic with excellent sound quality, an easy to reach mute button and two integrated directional mics for better sound pick up.

Premium Hall Systems

Large halls and gyms present a special challenge to communication. Speech gets distorted by reverberations and the larger distances between speaker and recipients. A PC Werth Premium Hall system improves things immediately - delivering speech-optimised sound from multiple speakers linked to an easy-to-use wireless microphone. A PC Werth Premium Hall system gives you the power and clarity to reach everyone in a crowded assembly or noisy gym whatever the event.

Fixed Premium Hall Systems

Robust and easy-to-use

The UK's Premium Hall/PA System for any event

Powerful output to cover any space
Totally customisable
Include CD/ DVD and iPod
Fantastic sound reproduction
Up to 8 separate inputs

Typical Units

- iPod Dock
- Up to 8 inputs
- 2-8 Wireless Mic Sets
- CD Player
- DVD Player

Portable PA Systems

PowerWave PA Systems

Where a temporary sound solution is required, the best solution is an all-in-one PowerWave portable PA. These amazing units are easily transportable and work from mains or battery, indoors or out! Powerful enough to reach large audiences, these great portable units come with everything needed to get up and talking instantly.

POWERWAVE 100

100: For outdoor events, disco and functions

Powerful, portable PA & music system for larger spaces and outside work.
100W PA system with 2 wireless microphones, 2 channels, CD/SD/USB/MP3 player and built-in battery for total flexibility.
Range of up to 70 metres, with built in wheels and handle for travelling.

POWERWAVE 50

50: Sports days, PTA events

Mid –Size portable PA & music system combines versatility, portability and power.
50W PA system with 2 wireless microphones, 2 channels, CD/SD/USB/MP3 player and built-in battery for total flexibility.
Range of up to 70 metres.

POWERWAVE 30

30: Table-top amplification and music

Table-Top Infra-Red PA system for rapid and easy deployment.
30W speaker system broadcasts sound and music. Small size makes this unit easy to carry and store for immediate use from the integrated battery.
1 pendant and 1 traditional style microphone.
Uses the latest Infra-Red technology, with a range of over 30 metres.
Also suitable for permanent installations with included wall bracket.

Use for

- Assemblies
- Speech giving
- Presentations & training
- Voice Reinforcement & Teaching
- Shows and stage
- Charity & events
- Discos & music
- Sports days & field trips

PowerWave DESKMATE

The PowerWave Deskmate is a unique portable wireless speech amplifier. Smaller than any similar device, yet it has two full range speakers and a long battery life. Deskmate is the perfect solution for hearing impaired children and adults in classroom or training situations where background noise or distance would make it difficult to hear their teacher or trainer. Just one of our solutions to improve access to education for any student with impaired hearing.

Deskmate is also great for teachers, lecturers, trainers and public speakers who have vocal chord problems that limit their volume of speaking. Teachers of children with AD/HD issues have also noted that the Deskmate allows them to focus on words spoken much more easily.

The design of the Deskmate allows it to unfold from a very small form factor when stored, to a full 2-speaker desktop PA in use. The tiny clip-on transmitter and headset microphone are so comfortable to wear you forget you've got them on. This makes the Deskmate one of the most convenient and unobtrusive speech amplifiers on the market.

POWERWAVE DESKMATE

Personal System

Unique portable wireless speech amplifier.

Deskmate uses the 2.4 GHz radio band which is licence-free and unlikely to suffer from interference. A lithium battery in the transmitter gives a long daily service life and doesn't lose its charge in storage. The system produces loudness and clarity with minimum effort from the user.

Deskmate comes complete with padded carry case, power supply, clip-on transmitter, lightweight head-worn microphone in black, user guide.

PowerWave Deskmate - minimum size - maximum sound and convenience.

System Healthchecks

Healthchecks

and Reviews

To book your acoustic review or a healthcheck call our Hearing Team on 020 8772 2700

Including Soundfield checks, annual healthchecks, noise and reverberation measurements.

Auditoriums, halls, classrooms etc can be very noisy places, but you can improve your conditions and environment by managing and maintaining signal noise ratio. We can help you with a simple appraisal of your particular environment, providing a general overview of any noise and reverberation issues and suggesting a number of cost effective solutions to be sure your conditions are right.

Our health checks can help provide peace of mind, by ensuring your Soundfield systems stay reliable and correctly configured for their environment. Health checks include:

- Full functionality check
- Product check, optimisation, review
- Configuration, installation and acoustics check

For more information and products see the Acoustics Section
